

# Neutrik Showcases TOP Series Products

**BOOTH C1642** Encompassing the powerCON TRUE1, etherCON and XLR product groups, Neutrik's new TOP series products is designed to provide maximum performance under challenging conditions created by moisture, particulate pollution, and sunlight. In addition to utilizing high-impact, UV-resistant materials per UL, Neutrik's TOP series products are certified to connector standards IEC 61076-2-103, IEC 60320, UL 1977 and UL 498 as well as UL 50E.

The powerCON TRUE1 TOP product line features all-black, high-impact, UV-resistant materials. The etherCON TOP products feature rugged RJ45 cable carriers; CAT 5 chassis connectors for vertical PCB mounting, horizontal PCB mounting, and D-size feedthrough. The XLR TOP product line comprises three- and five-pin male and female XLR cable connectors plus male and female D-size chassis connectors and a UV-resistant chassis connector protection cap.

Peerless-AV's Xtreme High Bright Outdoor Displays

## Peerless-AV Goes to Xtreme on Outdoor Displays

**BOOTH C2947** Peerless-AV is introducing its line of Xtreme High Bright outdoor displays at InfoComm 2018.

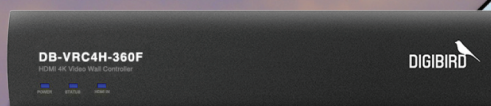

Ideal for any outdoor application, the Xtreme High Bright features a fully sealed IP68-rated weatherproof design and an operating temperature range of -31 degrees F to 140 degrees F. With a patented dynamic thermal transfer system that passively cools the display, there is no need for filters and exhaust fans, creating a maintenance-free solution for year-round use.

With full HD 1080p resolution and an IPS panel, the Xtreme High Bright offers a bright, crisp picture and superb color accuracy, even at the harshest of angles. The display's cover glass is IK10 rated and impact resistant, protecting against vandalism and debris in addition to being optically bonded and anti-reflective to offer outstanding picture quality, even in direct sunlight.

Featuring M+ Technology, the Xtreme High Bright saves end users up to 35 percent in power and cost, while maintaining a high bright performance. The displays are available in 43-inch, 49-inch, 55-inch and 65-inch models.

# Smart Wall Designers are Flying High With the Bird

Join the ranks of DigiBird integrators giving their customers today's best investment value. DigiBird Wall Controllers

- Dedicated hardware that nearly eliminates latency.
- Hot swap flexibility to grow with ease.
- Get assurance configuring and implementing your first and next 50 projects from Starin and friends.
