Advanced communication
 platforms

ARTIST / TANGO

ARTIST is a highly modular concept driving modern intercom demands. It is designed as a powerful matrix platform for intercom and the distribution of analog audio, digital audio and Ethernet data signals.
TANGO is the world's first network-based AES67 and AVB standard capable intercom system. As an exceptionally flexible platform, Tango accommodates current and future standards in broadcast, theater, and live-event environments.

Peerless-AV Revs Up for Daytona 500-Themed Activities

BOOTH 3401 Peerless-AV is bringing the Daytona 500 to InfoComm 2015. On Wednesday, June 17, and Thursday, June 18, Peerless-AV will be hosting a Happy Hour 4-5 p.m. for guests to start their engines for the night's activities.

The company also is hosting a Daytona 500 Giveaway. Entry involves a booth tour and visiting the Pit Stops, which will play host to a variety of the company's innovative audiovisual and digital signage solutions, including the Xtreme Outdoor Displays, PeerAir Pro and new line of kiosks.

Providing inspiration, Peerless-AV was recently named a Daytona Technology Platform Partner. As a partner, Peerless-AV Xtreme Outdoor Displays, UV2 Outdoor TVs, and mounts will be used throughout the Daytona International Speedway in

the Grandstands and Garage/Pit Areas.

Peerless-AV's Daytona 500 Giveaway winners will be selected on Thursday, June 18, at the 4 p.m. Happy Hour. The Grand Prize Winner will receive two tickets to the VIP section at the 2016 Daytona 500, a two-night hotel stay, airline gift card, and spending money. Second- and third-place winners will also be awarded exclusive prize packages.

Barco Launches Laser Phosphor Projectors

BOOTH 2529 Barco is offering the perfect blend of image quality, near-silent operation and low TCO in its new PGWU-62L laser phosphor projector. Available in two 6,000 lumen models—with WXGA or WUXGA resolution—the projector delivers "laser-sharp" images with brilliant, rich colors and foolproof performance thanks to solid state illumination. Featuring low weight, a compact footprint and contemporary white color, Barco laser phosphor projectors are the ideal fit for small to large meeting rooms, conference rooms, boardrooms, classrooms and auditoriums. The laser phosphor light source offers a 20,000-hour

lifetime and eliminates maintenance—no lamps or filters!—minimizing total cost of ownership.

VITEC, BOOTH 4344 VITEC is introducing its iMGW Ace appliance, a 100-percent hardware-based HEVC portable device for encoding and streaming video. Powerful yet compact, the advanced device features HEVC (H.265) bandwidth-efficient compression as well as legacy H.264 capabilities, supporting today's diverse and demanding field-based content requirements within settings such as live news broadcasts, sports venues or secure applications within military environments. Equipped with a

wide selection of I/Os and low power consumption using VITEC's HEVC compression chip, the flexible device is ideal for any high-quality audio or video streaming, as well as KLV metadata requirements whether in the field or on the move.
