

## **Peerless-AV® Announces Showcase at CEDIA 2018, Booth 4615**

*AV solutions designer and manufacturer to exhibit award-winning outdoor AV solutions for residential and light commercial applications*

**SAN DIEGO – September 6, 2018** – Peerless-AV®, an award-winning designer and manufacturer of the highest quality audio and video solutions and accessories, is excited to announce its showcase at CEDIA, Booth 4615.

Ideal for residential and light commercial applications, Peerless-AV's booth will heavily focus on its award-winning UltraView™ UHD Outdoor TV ([UV862](#)) and Xtreme™ Outdoor Soundbar ([SPK-080](#)). Being shown in the 86" version for the first time ever, the UltraView™ UHD Outdoor TV offers 4K resolution, an expanded input compartment, and DC power ports. The TV also has a high TN1 and IPS panel, allowing for it to thrive in all conditions and sun positioning, without the risk of isotropic blackout or loss of color accuracy.

The Xtreme™ Outdoor Soundbar is the perfect complement to Peerless-AV's outdoor TVs, offering 200 watts of total system power, an IP65 rating to withstand the most extreme environments, Bluetooth® compatibility, a universal mounting option, and both analog and optical connections.

To create the ultimate indoor or outdoor entertainment area, Peerless-AV will be showcasing its wide offering of mounting solutions. On display will be the SmartMount® Universal Flat Wall Mount ([SF670](#)), the SmartMount® Universal Tilt Wall Mount ([ST670](#)), the DesignerSeries™ Universal Ultra Slim Articulating Wall Mount ([SUA771PU](#)), the SmartMount® Articulating Wall Arm ([SA761PU](#)), and the Outdoor Articulating Wall Mount ([ESA763PU](#)). All of these mounts offer easy installation, a seamless design to match any outdoor aesthetic, and all-season weather protection.

For applications utilizing a projector, Peerless-AV will be exhibiting the PRG Precision Projector Mount with Spider® Universal Adaptor Plate ([PRG-UNV](#)) – a solution that offers patent-pending precision gears, simple installation, cable management, and a pre-assembled design, all while supporting most projector models.

Designed to further maintain a clean aesthetic with its installations, Peerless-AV's new In-Wall Media Storage System will be on display at the booth. Company product managers will be hosting live demonstrations of the system, showcasing its ease of use for home entertainment and technology implementations.

Rounding out its offerings, Peerless-AV will be featuring its PeerAir™ Wireless HD Multimedia System ([HDS-WHDI100](#)) and PeerAir™ Pro Wireless AV Multi-Display System ([HDS300](#)). Both systems offer users the ability to stream HD content through walls and ceilings, without running wires or having to complete any construction – ideal for creating the complete outdoor entertainment area.

“CEDIA has and continues to be an incubator for new products entering the residential market, specifically solutions that incorporate advanced technology such as IoT,” said Earl Naegele, Managing Director of Commercial Sales, Peerless-AV. “As an innovator in this space, we are especially excited to introduce for the first time, the 86" version of our award-winning line of UltraView™ UHD Outdoor TVs. With this expansion, users are being offered even more options when it comes to designing their outdoor entertainment space.”
