

## **Peerless-AV® Launches New SmartMount® Supreme Video Wall Mount with Quick Release at ISE 2018**

*New mount offers innovative, time-saving installation and maintenance features, including a quick release mechanism and more micro-adjustments than ever before*

**AURORA, Ill. – February 5, 2018** – Peerless-AV®, the award-winning designer and manufacturer of the highest quality audio and video solutions and accessories, is excited to introduce its newest video wall mount, the **SmartMount® Supreme Full Service Video Wall Mount with Quick Release (DS-VW775-QR)**, at ISE 2018, Hall 12, Stand F90.

Designed with the needs of integrators and end-users in mind, the DS-VW775-QR offers innovative, time-saving installation and maintenance features, including tool-less micro adjustment, easy hang wall plate, quick release mechanism, and reusable spacers for both portrait and landscape applications.

With the addition of tool-less lateral micro-adjustment, the DS-VW775-QR offers 1.5" of fine tune adjustment on each of the X, Y, and Z axes. The mount also features prominently colored adjustment knobs that can be easily located by installers during set-up and future video wall maintenance visits. Plus, serviceability is easier than ever before with the press to release pop-out feature, providing quick and convenient access to a recessed display without searching for hidden pull strings. The gentle release mechanism requires less pressure to pop-out a display than other video wall mounts, giving peace of mind that the delicate pixel structure will not be damaged from pressing too hard on the display front.

Reusable spacers can be used for both portrait and landscape applications resulting in a faster and more cost-effective install. Enhanced cable management allows the cables to effortlessly travel in and out with the display, eliminating the chance of interfering with the mount, as well.

“As the leading digital signage mount manufacturer in the industry, our key focus has and continues to be creating solutions that ease installation and maintenance, while aiding our customers in developing eye-catching video walls,” said Nick Belcore, Executive Vice President of Global Sales and Marketing, Peerless-AV. “We are excited to introduce this latest evolution of our award-winning Supreme Mount, now available with a built-in quick release mechanism. We are confident that this addition will provide integrators and end-users with expanded options when implementing video walls.”

The standard version DS-VW775, launched in 2016, has the same feature set as the new DS-VW775-QR, but offers unique red pop-out levers above and below. When the mount is fully extended it offers an extra 2" of service space from the wall compared to the SmartMount® Full-Service Video Wall Mount with Quick Release (DS-VW765-LQR/PQR).

Both Supreme models weigh significantly less than previous Peerless-AV video wall mounts. The DS-VW775-QR is 4.5lbs lighter and the DS-VW775 is 10lbs lighter than the DS-VW765-LQR Full-Service Video Wall Mount with Quick Release, for example. This makes these mounts even easier to handle and position, especially when combined with the installation app and reusable display-dedicated wall plate spacers. Using the easy hang keyhole adaptor plate, a single installer can simply hook the mount onto the wall, providing a hands-free environment to secure it – a valuable on-site time and cost saving feature.

The DS-VW775-QR and DS-VW775 support 46" to 60" displays with a maximum load of 56.8kg (125lbs) and VESA pattern up to 600 x 400. Included security hardware makes the DS-VW775-QR suitable for public environments to deter tampering and theft.
