

Driving Technology Through Innovation: Peerless-AV's InfoComm 2018 Showcase

AV solutions designer and manufacturer exhibits new Xtreme™ High Bright Outdoor Displays, SEAMLESS LED Solutions, Smart City and Outdoor Kiosks, Mounting Systems, and more at Booth C2947

LAS VEGAS – June 6, 2018 – Peerless-AV®, an award-winning designer and manufacturer of innovative audio and video solutions and accessories, is pleased to announce its showcase at InfoComm 2018, June 6-8, at the Las Vegas Convention Center. Peerless-AV's Booth (C2947) will highlight its new high bright outdoor displays, LED Program, kiosks, carts, custom mounting solutions, and more.

With over 75 years of audiovisual experience, Peerless-AV's commitment to the creation of cutting-edge technology has elevated the company to the status of an innovative industry leader. Peerless-AV proudly designs and manufactures the highest quality products, which solve even the most complex design and technology integration challenges to create an ideal solution for any unique application.

At InfoComm 2018, attendees visiting Peerless-AV's booth will have the opportunity to meet with Peerless-AV industry experts to discuss their upcoming integration needs. Further, they will have the opportunity to see the following products on display:

Outdoor Displays

Peerless-AV's newest addition to its line of performance displays, the Xtreme™ High Bright Outdoor Displays ([XHB Models](#)), offer 2500 nits of light output and full HD 1080p resolution for a bright, crisp picture and color accuracy at viewing angles up to 178°. Featuring a fully sealed IP68-rated design and an operating temperature range of -31°F to 140°F, there is no need to change filters or service the display, creating a maintenance-free solution for year-round digital signage use. Available in 43", 49", 55", and 65", the Xtreme™ High Bright Outdoor Displays include IK10-rated cover glass for the ultimate screen protection.

InfoComm attendees will have the opportunity to witness numerous live demos in Peerless-AV's booth, showcasing the unmatched capabilities of the new Xtreme™ High Bright Outdoor Displays.

LED Video Wall Mounting Solutions

With a modular design developed to fit the specifications of any LED display, Peerless-AV's LED mounting systems offer unlimited video wall configurations. The systems provide height and depth adjustments to overcome any installation irregularities, ensuring pixel alignment and a flat plane. In addition, a lightweight aluminum design and predetermined adaptor rail locations

speed and ease installation while minimizing errors. Peerless-AV's mounting systems also include tight tolerances and wall plate spacers, assuring all cabinets are properly positioned.

The new systems are part of [SEAMLESS by Peerless-AV](#), a one-of-a-kind all-inclusive or bespoke program for LED video wall integration. With SEAMLESS by Peerless-AV, integrators can expect start to finish support for all of Peerless-AV's LED mounting solutions.

Projector Mounts

Peerless-AV's Large Venue Projector Mount ([PJR250](#)) is designed to be installed and removed quickly, making it the ideal solution for the rental and staging market. It is built to safely support large ceiling structure venue projectors and provides tilt, roll, lateral, and swivel adjustments to obtain perfect image alignment. The mount is also equipped with dedicated adaptor plates to perfectly balance the projector's center of gravity, making it more sturdy and safe, and preventing the likelihood of projector sag over time.

Kiosks

Part of Peerless-AV's range of indoor and outdoor kiosks showcase is the All-in-One Kiosk Powered by BrightSign® ([KIPICT555](#)). This award-winning kiosk features a well-built, sleek design with an integrated 55" commercial LCD display that offers six points of IR touch. The All-in-One Kiosk features full HD 1080p60 video decoding, HTML support, networked content playback, and more.

For outdoor use, Peerless-AV's showcase will also feature the new Smart City Kiosk. An all-weather rated solution, this kiosk includes an [Xtreme™ High Bright Outdoor Display](#) with full HD1080p resolution, easy display access, and a seamless installation. With the ability to withstand up to 150 mph winds, the Smart City Kiosk is ideal for any outdoor setting.

Carts

Making its debut at InfoComm 2018, the ADA-compliant Motorized Collaboration Cart (SR598ML3) integrates the use of actuators, making it easy for users to raise and lower touch-enabled displays up to 25.6" with the touch of a button. It is also UL962 listed and features a safety limit function, which automatically reverses direction when a collision is detected in an upward, downward or lateral force.

The Motorized Collaboration Cart touts a six outlet, 2160 joule-rated surge suppressor and a 15-foot pre-installed cord in the rear of the cart, as well as a large enclosure with plenty of space for small PCs, additional cables, and keyboards, and an opening for an external Wi-Fi antenna. Its base includes bumpers to prevent damage, though it is designed to fit easily through doorways. Further, the cart features 4" casters for rigidity and stability, as well as a pre-assembled design with no wiring required – providing the fastest cart assembly on the market.

To see Peerless-AV's full showcase of outdoor displays, kiosks, mounts, carts, and more, visit InfoComm Booth #C2947.
