

Peerless-AV® Introduces New Large Venue Projector Mounts for Rental and Staging Applications

New mounts offer quick, safe, and easy installation, supporting a wide range of large venue projector mount brands

AURORA, Ill. – July 17, 2018 – Peerless-AV®, an award-winning designer and manufacturer of the highest quality audio and video solutions and accessories, today announced the availability of its Large Venue Projector Mount (PJR250).

An extension to Peerless-AV's projector mount product line, the PJR250 is designed to provide a quick, safe, and simple installation – making it the ideal solution in rental and staging settings where products in venues may frequently change.

The PJR250 features a low profile, pre-assembled design with a Hook-and-Hang™ system and unique dedicated adaptor plates that support all major large venue projector brands.

"In developing our Large Venue Projector Mount, our team focused heavily on the impact that the design would have on the installation process," said Nick Belcore, Executive Vice President of Global Sales and Marketing, Peerless-AV. "Including options like the Hook-and-Hang™ feature as well as dedicated adaptor plates was a must for this solution. We wanted integrators to be able to install and un-install large format projectors as seamlessly as possible."

For a quick and easy installation, the PJR250 includes a simple Hook-and-Hang™ feature, which provides a large landing area when securing a projector to the mount. In addition, the dedicated adaptor plates place the center of gravity in the middle of the mount, simplifying adjustments and achieving the perfect balance when ceiling or flush mounting a projector. A unique feature in the market, these adaptor plates significantly reduce installation time by eliminating the need to install legs, which can be difficult to stabilize and can lead to projector sag over time.

To obtain perfect image alignment, the PJR250 features horizontal adjustment up to 3" as well as tilt (+15/-5°), roll (±5°), and swivel (360°) adjustment, which are lockable to prevent even the smallest shift to the image once installation is complete.

The PJR250 includes a safety cable for assurance when handling and installing large projectors, as well as integrated cable management, allowing the cables to be routed through the projector mount for a clean aesthetic.

Peerless-AV's Large Venue Projector Mounts are available now through Peerless-AV direct sales representatives and authorized distribution networks.
