

2016 Rail Conference Showcase: Peerless-AV® Fully-Sealed Outdoor Displays and Custom Kiosks, Booth 317

Xtreme™ displays and kiosks enable year-round outdoor communication solutions for transportation applications

PHOENIX – June 17, 2016 – Peerless-AV®, the leader in digital signage solutions, is pleased to showcase its fully-sealed outdoor display and custom kiosk solutions at the 2016 Rail Conference, June 19-22 at the at the Sheraton Grand Phoenix, Booth 317.

Ideal for rail transportation settings, the [Peerless-AV Xtreme™ Outdoor Displays](#) are capable of year-round outdoor digital signage with Peerless-AV's weatherproof technology. Exhaust fumes, chemicals, micro particles, and brake dust amidst train stations and subways are the "silent killers" of most transit tech. To combat this, Peerless-AV's flat panel displays are 100% sealed and engineered to endure the elements. With a patented Dynamic Thermal Transfer™ system along with IP68 and NEMA 6 ratings, the Xtreme™ displays offer the widest operating temperature range available (-40° - +140°).

From sharing schedules and delays with riders to entertainment and advertising, the 1080p HD displays are an easy to maintain, cost-effective, and reliable solution for communication. Most "outdoor" displays still rely on vents, filters, and fans, meaning the filters must be regularly changed as fumes, dirt or brake dust clog the exchange of air in and out of the display.

However, the Peerless-AV Xtreme™ displays are as unaffected by these as they are by the weather—the patented, fully-sealed ventless design keeps debris outside the display while protecting the electronics within. Additional key features of the displays include ambient light sensors for easy reading, shatterproof, impact-resistant safety glass to prevent breakage, and more.

Also on display will be Peerless-AV's custom kiosk solutions. With the incorporation of Xtreme™ displays, Peerless-AV offers on-wall, in-wall, and floor standing portrait and landscape kiosks that can be placed both indoors and outdoors. With features such as media players and touch capabilities, Peerless-AV's custom kiosks offer a multitude of solutions ideal for public transit settings. From ticketing to weather updates, wayfinding, scheduling, entertainment, and more, Peerless-AV digital signage solutions enhance the traveler's experience by providing aesthetically-pleasing, up-to-date communications. The kiosks also reduce staffing costs and more efficiently utilize resources.
