

Peerless-AV® Showcases HD Flow™ Pro Wireless Multimedia Kit (HDS200) at CEDIA Booth #1341

DENVER – September 11, 2014 – Peerless-AV®, the leader in digital signage and AV solutions, is pleased to showcase its HD Flow™ Pro Wireless Multimedia Kit at the CEDIA EXPO 2014 Booth #1341.

Perfect for streaming HD content wirelessly when running cables is not an option, the Peerless-AV® HD Flow™ Pro Wireless Multimedia Kit can transmit content through walls and ceilings, offering multi-room streaming capability.

With five inputs and the ability to multicast to up to four displays, this wireless workhorse streams Full HD 1080p and passive 3D signals up to 131ft to an HDTV, projector or any other display – offering ultra-fast, long range, high-quality signage streaming.

For the ultimate in security, the HD Flow™ Pro Wireless Multimedia Kit creates the HD Flow™ Pro (802.11n) private network, which resists interference and network sharing from nearby wireless routers.

The system's built-in IR removes the need for line-of-sight placement to control source devices such as DVR/set-top box, satellite box, Blu-ray®/DVD player, media server, VCR, or game consoles. The HD Flow™ Pro Wireless Multimedia Kit offers a plug and play setup that requires no software or driver installation.

For new installations and retrofits alike, the HD Flow™ Pro Wireless Multimedia Kit is a project-saving tool for professional AV integrators for both commercial and residential applications.

The HD Flow™ Pro Wireless Multimedia Kit is currently available through Peerless-AV® direct sales representatives and authorized distribution network.
