

## **Peerless-AV® to Showcase a Vision for the Future of Education at TCEA 2020**

*Booth #222 will feature Smart City Kiosk and Mobile Carts ideal for Education Applications*

**AUSTIN, Texas – February 3, 2020** – Peerless-AV®, an award-winning designer and manufacturer of innovative audio and video solutions and accessories, is pleased to announce its showcase at this year's Texas Computer Education Association (TCEA) Convention & Exhibition taking place at the Austin Convention Center from February 3-7. Peerless-AV will be featuring a variety of digital signage solutions, including the [SmartMount® Flat Panel Cart for 55" to 98" Displays](#), [SmartMount® Motorized Height Adjustable Interactive Touch Panel Cart](#), and [Outdoor Smart City Kiosk with an Xtreme™ High Bright Outdoor Display](#) at Booth #222.

To showcase the range in mobility for education applications, Peerless-AV will be exhibiting its **SmartMount® Flat Panel Cart for 55" to 98" Displays (SR598)**, a solution that enhances school curriculums. UL® certified, the cart can be easily and safely moved between classrooms, offering a cost-effective option for school districts. Additional features include display height adjustment, a pre-assembled base for quick assembly, and an attractive structure.

Peerless-AV will also be showing its **SmartMount® Motorized Height Adjustable Interactive Touch Panel Cart (SR598ML3)** at TCEA. Featuring a design that safely mounts, moves, and stores an interactive display, the SmartMount® Motorized Height Adjustable Cart increases productivity among educators and students. UL® listed actuators allow users to raise or lower a display, up to 25.6" (650mm), with the touch of a button. For easy setup and storage, the rear compartment provides a secure area for a PC and power strip, while the cable management cord wrap neatly stores the power cord when not in use. The cart's large wall plate and locking casters provide a stable foundation for touch applications, and the integrated handles allow users to easily maneuver the cart from room to room. Integrating technology into classrooms, campuses, and libraries is possible with this highly functional solution that is ideal for any touchscreen application.

Another ed-tech solution for educators that promotes engagement is Peerless-AV's award-winning **Outdoor Smart City Kiosk with an Xtreme™ High Bright Outdoor Display (KOP2555-XHB)**. With a focus on functionality and aesthetics, the Smart City Kiosk is designed to be modern, approachable, practical, and durable for everyday use. Peerless-AV's Outdoor Smart City Kiosk is ideal for education facilities and campuses, making it easy to share school information, travel, and weather details, as well as offer campus wayfinding, advertising, entertainment, and more. The kiosk serves as a vital resource and tool for greater public engagement and seamless updates of important digital content whenever, wherever.

The TCEA Convention & Exhibition is a must-attend event for educators of all types and will

focus on resources needed for continued success in engaging learners and improving instruction.
