## MATROX C900

Matrox C900 is the world's first nine-output graphics card to drive nine 1920x1080 displays for 3x3 videowalls. C900's single-slot form factor and low power consumption at 75W offer digital signage and videowall vendors an easy to integrate video wall option. Supporting stretched desktop across all nine synchronized outputs allows users run any application full screen across a 3x3 videowall. At ISE this year, Matrox showed it in tandem with its a Mura IPX 4K capture and IP decoder card to demonstrate the ease of integrating streaming IP sources onto a video wall, including IP cameras, and Matrox Maevex-encoded sources.

## NEC UN551S

With just 0.9mm of inactive border around the edges, the NEC UN551S was designed to be a

more consistent and seamless video wall. The 55-inch displays feature professional-grade, S-IPS anti-glare panel technology that allows for less color shift and superior color uniformity, making them suited for broadcasters, command and control, and retail customers. The UN551S also features a full commercial build with a steel chassis, commercial-grade cooling fans, and temperature sensors, along with direct-LED backlighting. The UN551VS offers the same specs and features in a lower-power/lower-brightness option.

## PEERLESS-AV SMARTMOUNT SUPREME FULL SERVICE VIDEO WALL MOUNT

The latest addition to the award-winning SmartMount DS-VW

line, Peerless-AV's SmartMount Supreme Full Service Video Wall Mount (DS-VW775), is both lighter and easier to install and service, featuring new lateral micro-adjustments, convenient serviceability with a pop-out mechanism, and usability in both portrait and landscape orientations.

## STUNNING VISUALS

with the award winning  
**SENECA VWC-PLUS**  
Video Wall Controller

- 6th generation Intel® Core™ i7 Processor Extreme Edition
- Up to 32 independent displays
- True 4K capable
- HDCP Compliant
- Custom parallel sync technology
- Ideal for video walls and control rooms
