

IHSE USA // Draco tera compact UNI

The Draco tera compact UNI matrix switch provides the option to switch any combination of 3G-SDI, USB 3.0, and ultra-high-definition KVM using an SFP modular design. Each port is designed around the IHSE flex-port technology, which allows any port to be defined as an input or output. Frame sizes are available for 8, 16, 32, and 48 in 1 RU with 64 and 80 ports in 2 RU. **From the judges:** "IHSE USA continues to make incredibly robust products that provide lightning fast signal management in various form factors at value prices."

inMusic Brands // Marantz Professional PMD-500D Media Player

The PMD-500D is a DVD disc /SD/USB multi-format media player with dedicated features for professional use, such as RS-232C control, OSD Hiding Mode, Panel and IR remote lock function, and Power On Play function. It also features XLR balanced and RCA outputs for audio, and HDMI, digital video, component video and composite video outputs--all in a single rack space chassis. **From the judges:** "Comprehensive digital audio playback systems such as this are most valuable in houses of worship, educational facilities, etc. For many, this will be a true problem solver."

Leyard // TWA Series

With a slim 54-inch cabinet and the finest pixel pitches, Leyard TWS Series LED video walls deliver the pixel density and a 16:9 form factor to match LCD and rear projection video walls, but with a truly seamless video wall configuration of any size. They're designed for long-duty cycles, long life, and are available with a redundant video and power option to ensure continuous operation for demanding operations. The self-contained displays have standard HDMI inputs and looping, along with optional redundant configurations. **From the judges:** "The TWA Series was shown at InfoComm with stunning 8K native content. The massive configuration of eight panels wide by eight panels tall demonstrated an outstanding and seamless image."

Mackie // AXIS Digital Mixing System

With full Dante interoperability, the modular AXIS system combines the power of the 32-channel DL32R digital mixer and innovative DC16 control surface to deliver a live sound solution with stunning workflow efficiency. Large high-resolution screens provide high readability and the SmartBridge intelligently handles up to three iPad devices. Visual feedback and customization result in faster workflow speed, and it comes complete with flexible 32x32 recording and a selection of powerful DSP. **From the judges:** "One of the most innovative products in the collection of new gear I saw at InfoComm. While many other products may accomplish what the AXIS system can, none of them come in anywhere near this price point."

Matrox // MaeveX 6100 Encoders

The new line of encoders is designed for capture and real-time encoding, streaming, transcoding, and recording. The MaeveX 2 range of PCIe cards, stand-alone appliances, and developer tools provides multi-channel, full HD, 4K, and 8K streaming. From small and easy-to-use appliances all the way to packing up to 64 channels of 4K capture, real-time encoding and streaming into a single 5U rack enclosure, MaeveX 2 covers all your form-factor requirements. **From the judges:** "These are video cards taken to the next level."

Peerless-AV // SmartMount Supreme Full Service Video Wall Mount

A mount that's lighter and easier to install and service, it features new lateral micro-adjustments and convenient serviceability with a pop-out mechanism. Ideal for creating video walls in various applications, the DS-VW775 offers simple, tool-less micro adjustments, both vertically and laterally, for 1.5in. of fine tune adjustment on each of the X, Y, and Z axes. With the DS-VW775, displays are seamlessly aligned while tedious calculations and onsite guesswork are eliminated for installers, reducing the time and cost of installation. **From the judges:** "A great advance in video wall mount features. Flexible and well thought-out."
