

**InFocus Mondopad INF522AG**

**The What:** InFocus has added the 55-inch Mondopad INF522AG to its Mondopad family of touch-enabled collaboration displays. The 55-inch Mondopad is an all-in-one collaboration system that supports HD videoconferencing, interactive whiteboarding, web browsing, data sharing, presenting,

document annotation, and wireless casting.

**The What Else:** The 55-inch Mondopad features Total Touch Control, a system management interface that eliminates the need for a remote or buttons. Users can touch on-screen icons to switch between sources, or to access the home screen, all applications, and control functions. In addition, the 55-inch Mondopad allows for annotation over any input. Content from the built-in PC, an external PC, or tablet connected via wireless casting, HDMI or VGA connections, can be frozen on the screen, annotated over, and then saved as a screen capture to internal storage or an external USB drive.

**The Bottom Line:** The 55-inch, 1080p, anti-glare touch display is designed for easy use with edge-to-edge multi-touch supporting 10-point gestures. The Mondopad INF522AG is powered by an Intel Core i7 processor with 256GB solid-state drive, includes Windows 10, a full version of Microsoft Office, and features built-in Android 5.0 applications including Quick Whiteboard, Quick Casting, and Quick File Viewer for fast access to the most commonly used tools.

**Peerless-AV IF Mount**

**The What:** Peerless-AV has introduced the new IF Mount for Samsung Direct View LED Displays.

**The What Else:** The new mount securely holds the Samsung IF display to form a properly aligned, seamless video wall.

Its height and depth adjustment overcome pixel irregularities and wall imperfections for optimal alignment, and its low-profile design meets ADA requirements. It features a modular, lightweight aluminum design to minimize wall load, ease installation, and allow for a wide variety of configurations. It also features wall plate spacers to reduce the need for measuring, and to help improve parallel installation.

**The Bottom Line:** Designed for creating video walls in public and nonpublic spaces, such as corporate lobbies, stadiums, airports, shopping malls, train stations, control rooms, and more, the IF mount is a modular solution that comes kitted together for ease in configuration. With this mount, integrators can tile LED displays to create a large video wall.

**Sonance Professional Series Low-Profile**

**The What:** Sonance has added new low-profile models to its Professional Series to provide a solution for installations with depth restrictions or in-ceiling obstructions.

**The What Else:** The new low-profile models include the PS-C43RTL, a 4-inch, two-way speaker in a 6.5-inch baffle that is 3.43 inches (85mm) deep; and the PS-C63RT, a 6.5-inch, two-way Speaker in an 8-inch baffle that is only 4.37 inches (111mm) deep. The In-Ceiling speakers feature a bezel-less grille design to minimize visual distraction and reduce shadow lines, while also providing for a

# SOLUTION ISO-MAX: the Jensen DIN-LI Line Isolator

Order #: J400-0004

Call Jensen: (818) 374-5857

Made to mount on a standard 35mm DIN rail, the ISO-MAX<sup>®</sup> DIN-LI eliminates hum and buzz caused by ground loops, RF interference, and light dimmer noises in commercial A/V systems. You plug it in and it works... without introducing distortion or other artifacts of any kind.

ISO-MAX<sup>®</sup> - solutions to make your job easier.
