**NewTek TriCaster Mini HD-4 sdi**

**The What:** The NewTek TriCaster Mini HD-4 sdi is a complete and compact multimedia studio featuring HD-SDI hardware.

**The What Else:** The TriCaster Mini HD-4's compact size, simplicity, and rich feature set make it easy to carry in one hand, set up, create and share a complete

program in a matter of minutes. Broadcasters and video professionals adding the TriCaster Mini to their toolboxes can produce uncompromising multi-camera content from anywhere using SDI cameras, and take advantage of its portability and ease of use without adding adapters to convert to HDMI. They can create video coverage in more locations, with longer cable runs than possible with HDMI, and with the security of professional-standard BNC connections that lock in place.

**The Bottom Line:** The new model provides customers a choice between professional SDI I/O and the popular, ultra-portable HDMI version of TriCaster Mini allowing even more users to transform their presentations into engaging multimedia content that looks like network-style TV.

**Peerless-AV SmartMount**

**The What:** Peerless-AV SmartMount Carts and mounts are designed for interactive displays in the classroom.

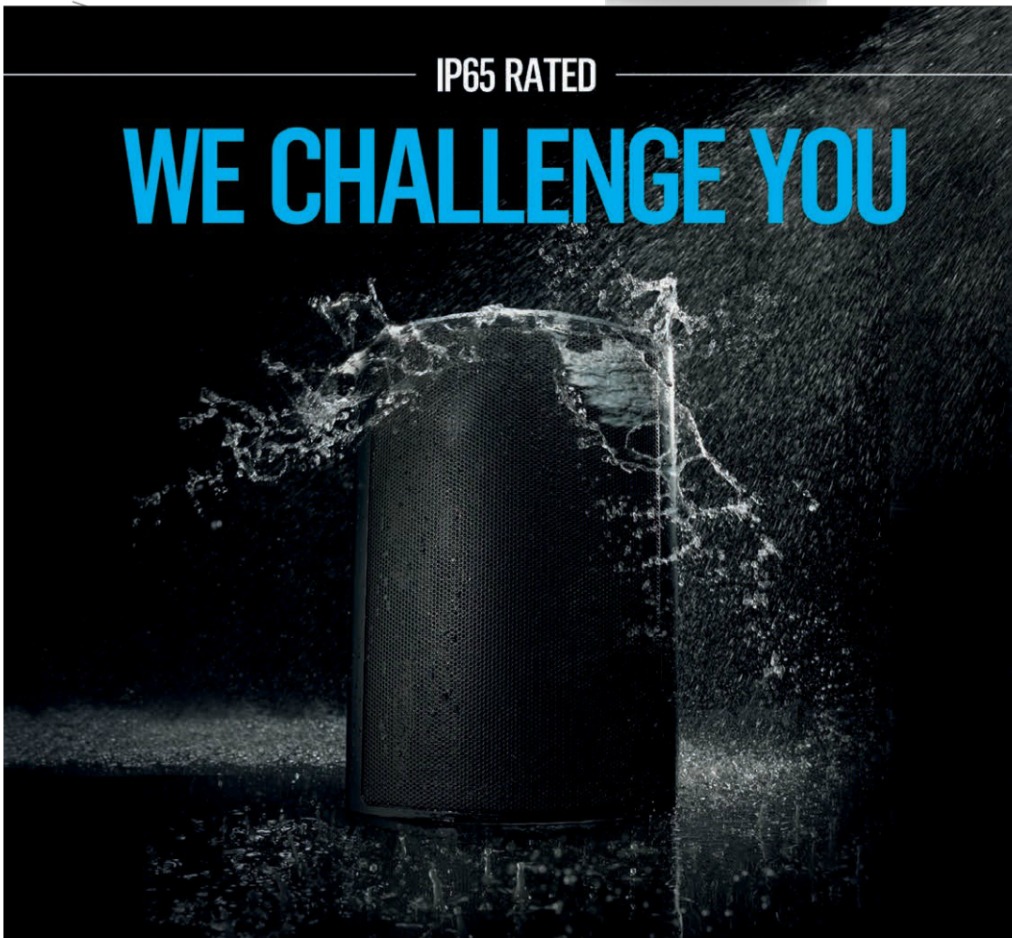

**The What Else:** The SR580 and SR598 SmartMount Carts hold interactive panels up to 80 inches and up to 98 inches, respectively. Ideal for extra-large touch displays, these heavy-duty carts offer mobility, appealing design, display height adjustment, and a pre-assembled base to ensure quick assembly, while providing a ridged structure that fits into any décor. The 4-inch castors make them easy to move from room to room and the UL certification ensures that it can be done with safety in mind.

**The Bottom Line:** Peerless-AV's new SmartMount Carts also provide cost savings, serving as a mobile solution that can be used in numerous locations in place of purchasing multiple displays for multiple classrooms. In addition, the new carts have been extensively tested, ensuring the safety of products that enable mobility without the fear of tipping or structural failure, which is particularly important when in use by children.

IP65 RATED

WE CHALLENGE YOU

TO A DUAL.

We've subjected the AMS range to the most rigorous environmental testing in Tannoy's history - achieving a category leading IP65 rating which is amongst the highest in the industry.

This latest generation of Dual Concentric drivers has its genesis in many of the world's high end recording studios, therefore, the new AMS loudspeakers ensure that playback of recorded material sounds exactly as the engineer intended when it was mixed in the studio, making them perfect for indoor and outdoor entertainment venues - in fact anywhere true sonic clarity and long term reliability is essential. We challenge you to a Dual!
