

THR-300P

Thermal Screening Self-Service Kiosk

INTEGRATED WITH A 22" AOPEN ETILE, FLIR TEMPERATURE SENSOR, AND 22MILES TEMPDEFEND™ PREMIUM PROTECTION SOFTWARE

Peerless-AV's new indoor Kiosk is integrated with a 22" AOPEN eTile Windows-based all-in-one, as well as FLIR sensor with contact-less thermal sensing and digital signage software from 22Miles. The TempDefend™ Premium Protection thermo-sensing system leverages a combination of camera technology, facial and body temperature detection software, integrated sensors, and dynamic machine learning algorithms to aid in the prevention of viral spread. The self-service, non-contact temperature screening system will alert individuals of heightened temperature status as they enter the premise, alleviating customer and staff concerns. This plug-and-play kiosk is available to immediately deploy in a variety of settings, such as corporate, retail, hospitality, and education.

KIOSK FEATURES

- Designed, manufactured and assembled in the USA
- Additional add-ons include: router, web camera, amplified audio system, and caster wheel base
- A wide range of custom aesthetic options also available; options include custom color finishes, vinyl logos, wraps, etc.
- Tested to UL safety standards and pending official certification

Kiosk design and component specifications subject to change without notice

TEMPDEFEND™ PREMIUM PROTECTION SOFTWARE FEATURES

- Full face, skin temperature, and face mask detection
- Custom branding with user-defined work flow (Web editor CMS included to update content)
- Voice-controlled video call option upon elevated temperature detection included
- Automatic email notification option upon elevated temperature detection included
