

Peerless-AV (peerless-av.com) announced the launch of its **SmartMount Motorized Height Adjustable Flat Panel Cart** (SR598ML3E) for education applications. The Motorized Height Adjustable Flat Panel Cart is ADA compliant, offers multiple accessories, including a laptop tray, video conferencing shelf, six-outlet surge protector, PC mounting plate, and power cord manager. Focusing on ease of use, the cart also features 4" casters for rigidity and stability and a pre-assembled design with no wiring required – making installation seamless.

Promethean (www.PrometheanWorld.com) showcased their **Promethean Escape Room** experience and announced their debut of their new 'For the Love of Learning' campaign along with the 2018 US Promethean Grant winners at FETC. Promethean also previewed its new ActivPanel Elements Series Featuring an intuitive menu experience, Vellum touch/writing technology, and access to a choice of ActivInspire and cloud-based ClassFlow software programs as standard, the ActivPanel Elements Series continues Promethean's commitment to education.

Verso Learning (versolearning.com) has added several new features, including improved **student-to-teacher feedback**, exit tickets to elicit student responses to questions related to lessons or activities, and an improved teacher dashboard to provide visibility into the impact of instructional practice at the class and student level. Verso also enables teachers, coaches, and mentors to share insights and provide structured feedback for other teachers. Teachers can use this feedback to improve their pedagogical approach and lesson designs.

ADOBE & ROYAL SHAKESPEARE COMPANY EDUCATION EXCHANGE

(edex.adobe.com) & (www.rsc.org.uk)

Adobe redesigned its Education Exchange, a free online learning platform designed by and for educators to ignite creativity in the classroom.

Enhancements include a simplified layout, visual timelines to track progress, personalized course recommendations and collaborative workshops. The Exchange features new courses on visual storytelling and UX/UI design with Premiere Rush and Adobe Spark. Inspired by educator feedback, the redesigned Exchange aims to provide better access to professional development and teach creative problem solving

ALIVE STUDIOS RUGS ALIVE MOBILE APP

(alivestudiosco.com)

Alive Studios has unveiled Rugs alive, a classroom rug that,

along with the free Rugs alive mobile app, can turn smartphones and mobile tablets into a magic window through which students can see 26 animals—one for each letter of the alphabet—come to life. As they practice their letters with the rug, students can also practice early STEM concepts by matching animals to their habitat. Students can then walk around the habitat, take pictures, and more.

AMPLIFY MCLASS EARLY LITERACY SUITE

(www.amplify.com)

Amplify announced that it is launching a new mCLASS suite that includes teacher-

led and adaptive student-driven **mCLASS**[®] instruction, as well as the mobile version of the DIBELS 8th Edition assessment developed by the Center on Teaching and Learning at the University of Oregon's College of Education. The updated mCLASS early literacy suite integrates assessment, instruction, and intervention programs to help educators provide reading instruction for all students. It will be available for the 2019–2020 school year.
