DIGITAL SIGNAGE PRODUCTS

LIGHTWARE MODEX MODULAR EXTENDER

Lightware Visual Engineering continues to offer great flexibility to its customers with the Modex family, the world's best and fastest modular extenders supporting the AV and Broadcast industry's formats. Modex (Modular Extender) offers a full range of modular transmitters and receivers extending digital and analog video and audio, USB KVM, Ethernet and control signals over a single fiber or CAT5/6/7 cable. The technology built into the Modex family breaks many standard limitations allowing 98 feet (30 meters) DVI cable on input, Advanced EDID Management, Pixel Accurate Reclocking, LAN, RS-232, RS-422 and USB control, remote powering and more.

PEERLESS-AV XTREME OUTDOOR DISPLAYS

Designed for year-round use, Peerless-AV's Xtreme outdoor displays are perfect for digital signage applications. Eliminating the need for vents, filters or exhaust fans, the fully-sealed design provides the ultimate protection against weather, water and dust. A patented Dynamic Thermal Transfer system keeps internal components safely warmed in extreme cold (-40°F) and properly cooled in extreme heat (140°F). Far surpassing ordinary outdoor displays, the Xtreme displays have achieved IP68 and NEMA 6 ratings with true ease.

PLANAR ULTRARES 98-INCH TOUCH

The Planar UltraRes 98-inch Touch LCD display is the industry's largest 4K touch display. The Planar UltraRes 98-inch Touch combines a multi-touch, multi-user experience with native Ultra HD resolution. The display features 32 simultaneous touch points, and is designed for a wide variety of resolution-rich, interactive digital signage applications.
