# The New Digital Lobby

## ENGAGE YOUR GUESTS

70% of travelers say that a hotel's digital offerings have a moderate or strong impact on their choice to stay there, and it's time to give your guests the digital experience they crave.

Peerless-AV® is your one stop shop for anything digital - from large format video wall mounts, to outdoor weatherproof displays, to interactive kiosks, let our team of hospitality experts guide you on this digital journey.

### ◀ Peerless-AV New All-in-One Kiosk Powered by BrightSign

**BOOTH 3429** Ideal for indoor hospitality and retail applications, Peerless-AV will be showcasing its new second-generation All-in-One Portrait Kiosk powered by BrightSign. The new All-in-One Kiosk (KIPICT2555) features a BrightSign XT1144 Expanded I/O Player, making it perfect for a range of uses such as entertainment, wayfinding, information gathering, and more. This newest iteration of the kiosk delivers Full HD 1080p60 single video decoding, HTML support, and networked content playback, as well as an abundant set of features such as interactivity via the GPIO port, remote snapshot, live text, media feeds, and multi-zone. The kiosk's sleek, stylish design offers the ruggedness needed for public use as well as simple installation via micro SD card, USB, or cable, and a smaller footprint. The All-in-One Kiosk's commercial LCD display offers ten points of IR touch, creating a truly interactive experience for hotel guests and shoppers.

### Digital Projection INSIGHT 4K HFR 360 Projector ▶

**BOOTH 1642** Made possible by ultra-fast frame rates and native 4K resolution, the new INSIGHT 4K HFR 360 from Digital Projection allows multiple viewers to have a unique 3D viewing experience, allowing users to see and interact with the displayed content and each other in a truly collaborative manner. Pushing the boundaries of 3D technology, the INSIGHT 4K HFR 360 delivers 360 frames per second at native 4K resolution, enabling content creators to serve three independent, high-resolution 3D views from one projector, or up to six with the addition of a second unit, all while tracking their movements and maintaining their individual perspectives from their changing positions.

The possibilities for this new technology are endless. Users can create virtual rides in theme parks or immersive exhibits in museums such as a virtual tour of an ancient building or a lifelike experience with precious artifacts. Experience it first-hand at InfoComm 2019.
