Sharp Launches New Interactive AQUOS BOARD

BOOTH 1207 How could something much smaller have even greater impact? The latest addition to the AQUOS BOARD family, the new Sharp 40-inch Class (39.5 inches diagonal) PN-L401C AQUOS BOARD interactive display system answers that question in landscape, portrait or face-up orientation. For digital signage applications, the PN-L401C serves as an interactive information interface to enhance the consumer experience. And for offices it enables interactive collaboration and productivity in the increasingly popular "huddle space" environment.

A smaller screen size doesn't mean a sacrifice of functionality. The PN-L401C interactive display shares some great features of other models in the award-winning AQUOS BOARD interactive display line including the Sharp Pen-on-Paper user experience, which resists fingerprints and scratches, as well as providing an anti-glare surface. Incorporating Sharp's own capacitive touch technology, which offers extremely precise and smooth operation, its 2 mm-tip touch pen is ideal for accurate onscreen writing of fine lines and text. It also offers Full HD (1920 x 1080-pixel) resolution, 10-point multi-touch functionality, advanced connectivity, a de-

tachable tabletop stand and much more. Additionally, an expansion slot compatible with the Intel Mini Open Pluggable Specification (Mini OPS) supports the addition of an optional wireless or HD-

BaseT receiver board. Finally, the PN-C401C comes bundled with SHARP Pen Software. SHARP Display Connect and SHARP Touch Viewer software may be downloaded at no additional cost.

Peerless-AV Showcases SmartMount Systems

BOOTH 907 Peerless-AV is showcasing its SmartMount Video Wall Mounting Systems at DSE 2017.

Featuring a quick and easy pop-out mechanism that can be adapted to support various brands and display sizes, Peerless-AV's SmartMount Pop-Out LED Video Wall Mount (DS-LEDP) offers a modular design enabling custom installs for specific configurations.

The universal nature of the SmartMount Pop-Out LED Video Wall Mount gives

installers infinite choices as they look to specify more full-color, high brightness, big viewing angle LED displays in their projects.

Key features of the SmartMount Pop-Out LED Video Wall Mount include a clean and aesthetically pleasing installation based on a slim, space-saving design. The pop-out mechanism allows for the mount to extend up to 30 inches from the wall, providing ample space for a technician to service and maintain the LED displays. Plus, the mounting system's universal design can be easily configured to support most LED brands and sizes by simply changing out display-specific adapter plates.

The mounting system's easy hang wall plate enables a fast, trouble-free installation and scissor arms behind the mount provide easy mount articulation without the risk of damage to the LED display. In addition, integrated cable management allows for a clean finish.
