Castle Dice Tower

Page 1 / 6

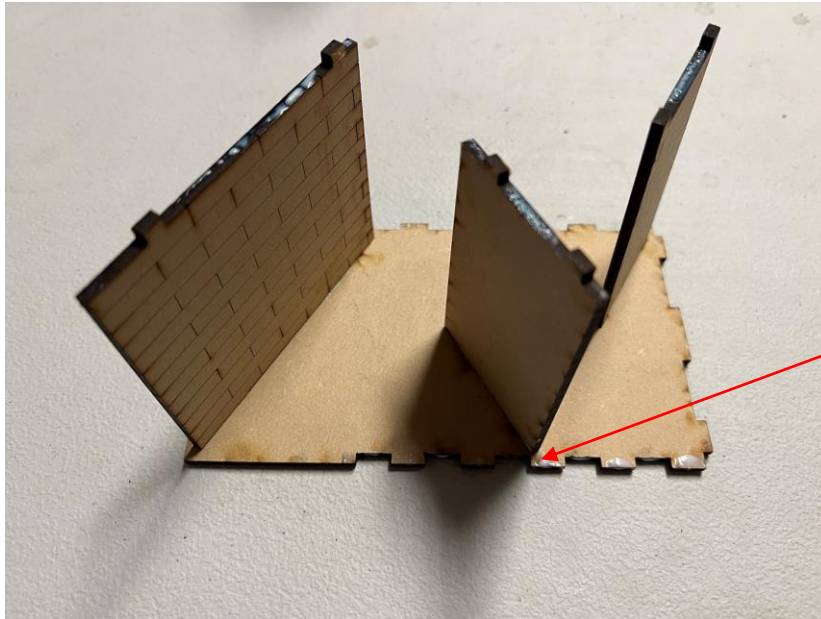

1. Check to ensure all parts are on the 5 sheets

2. Pick out the 5 pieces below which forms part of the castle wall and the internal dice ramps

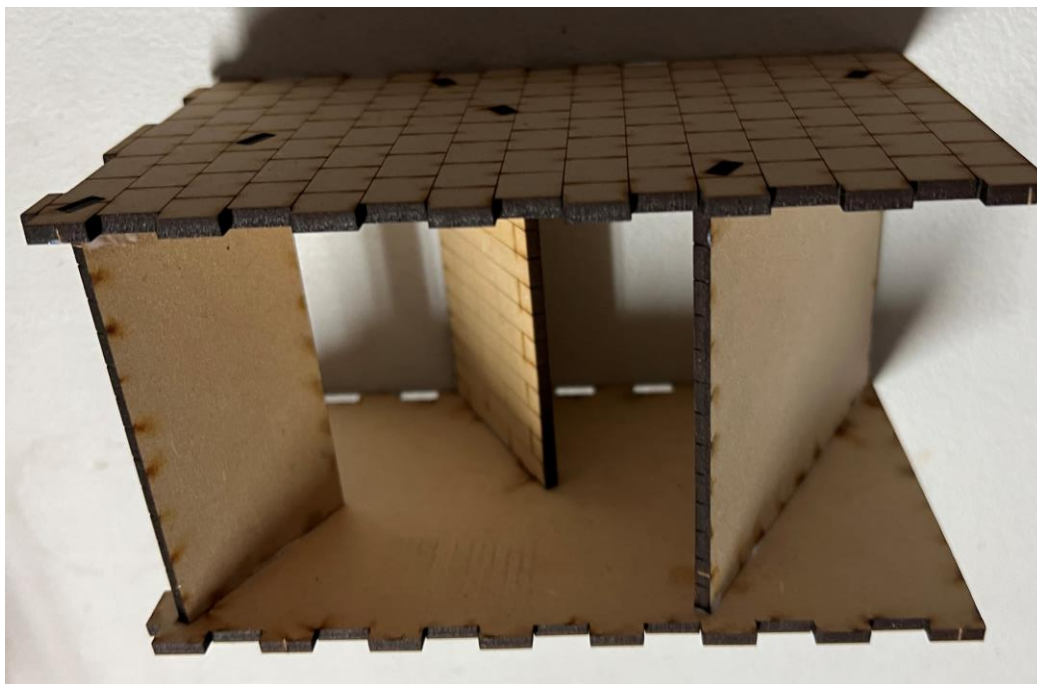

3. Place one castle wall on the side and glue the 3 internal dice ramps as shown

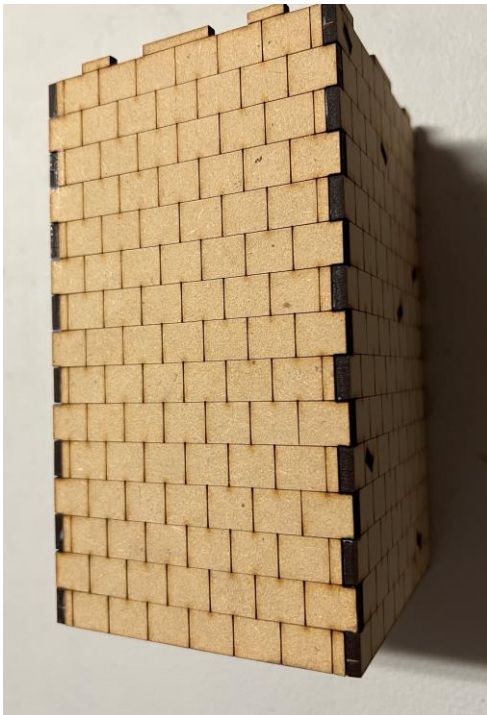

Make sure the orientation of the middle ramp allows for space for the external wall

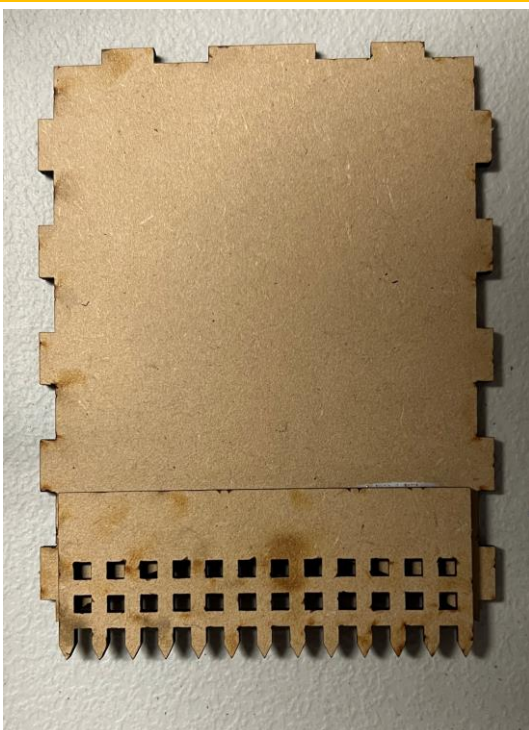

4. Glue opposite external wall on top

5. Rotate and glue the back external wall as shown below

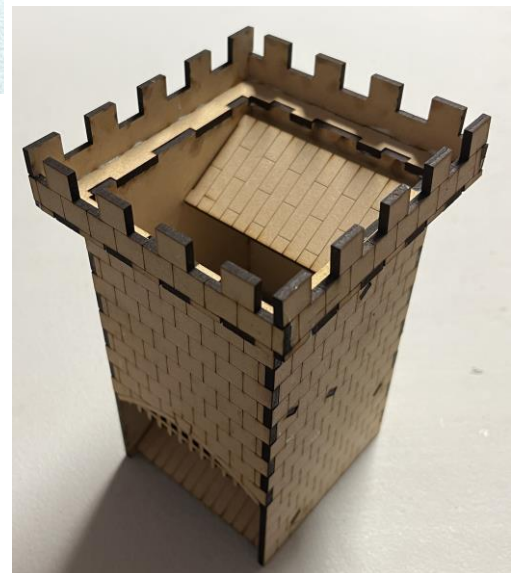

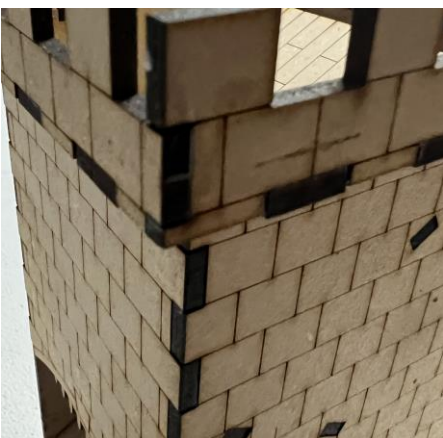

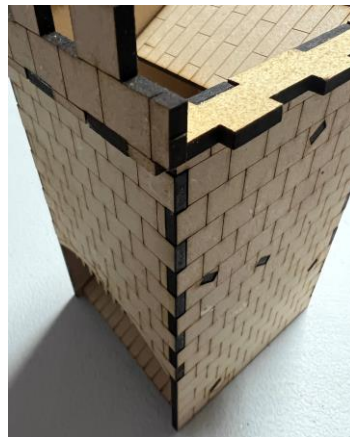

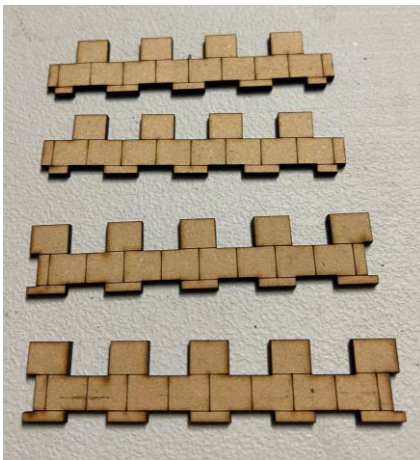

6. Glue the porticullis to the inner part of the front external wall gate section (has a curve). Then glue this to complete the tower section.

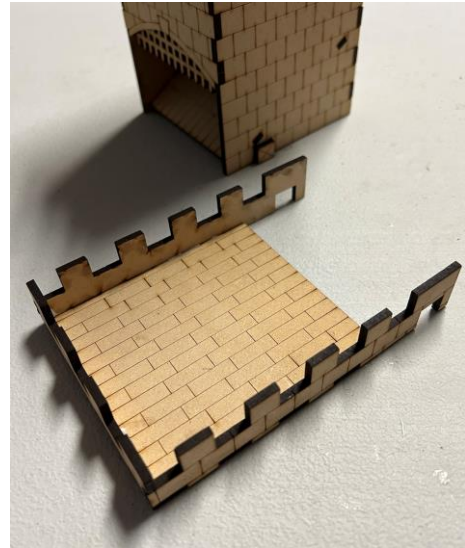

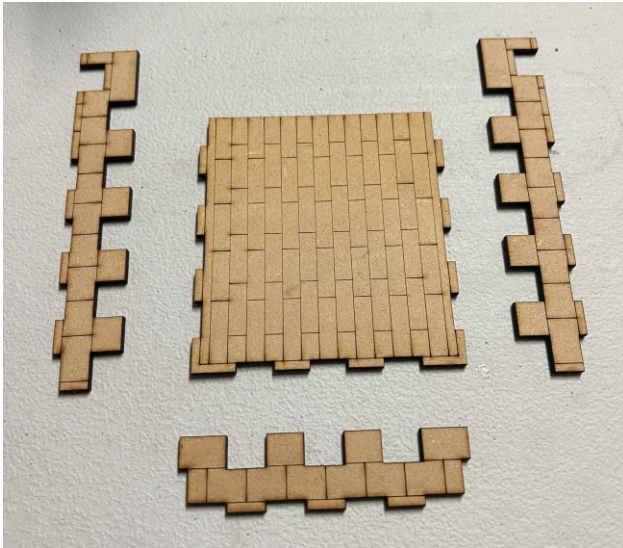

7. Glue the top castle ring as shown

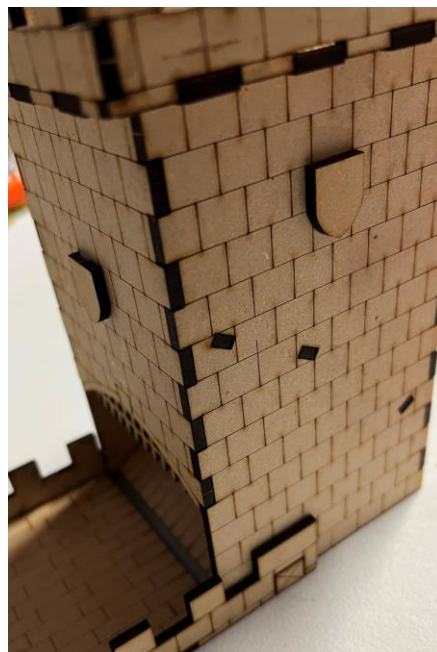

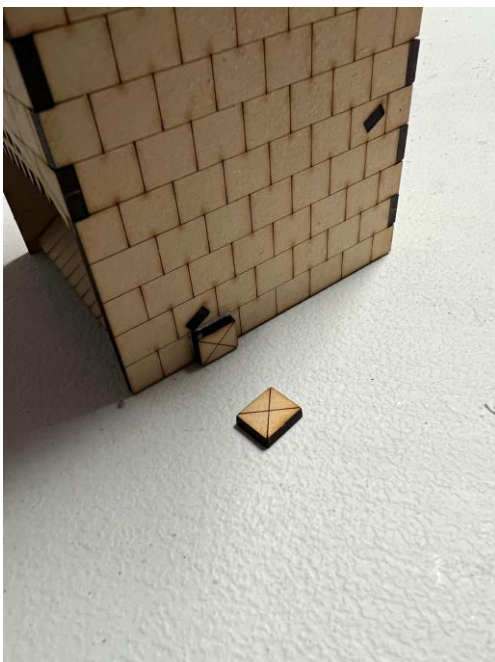

8. Then find the 4 pieces of the castle parapets and glue as shown

9. Gather the 3 ramp pieces and glue as shown

10. Glue the 2 rectangles with an X over the X brick on the external wall. This will allow the Removable ramp to clip on and off when not in use.

11. The Ramp can be folded up when not in use

Also you add the shield décor to the external wall
