

# ALUMITONE® WIRING DIAGRAMS

## Single Coil Sized

Orange to selector switch  
White with black stripe to ground  
Green to ground.

The phase of the Alunitone can be changed by having the white with black stripe connect to the selector switch and the orange and green connect to ground.

To Ground

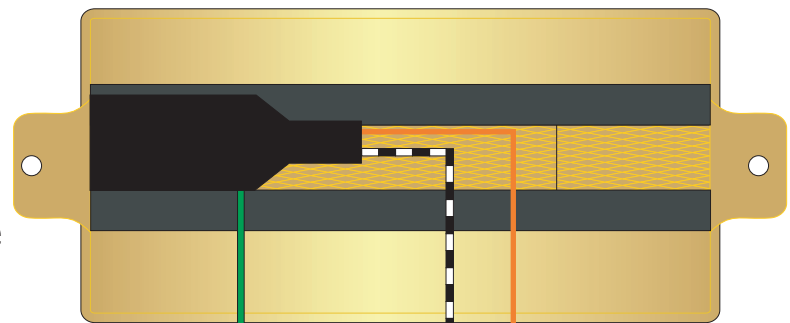

To ground

Orange: hot - to switch

## Humbucker sized ALUMA-90

The Alunitone series wires into your regular Lace Sensors. Please check the color codes here and apply them to the various guitar diagrams on the site.
