

21.5" Open Frame, Desktop or Wall Mountable Capacitive Touch or Non-Touch Display

M21580-OF - Non-Touch

M21580C-OF - Capacitive Touch

21.5" Open Frame, Desktop or Wall Mountable Capacitive Touch or Non-Touch Display

The Mimo Open Frame Series is designed for demanding environments and applications such as quick service restaurants, stadiums, financial, gaming, industrial, self-service terminal and many other commercial applications. Our Open Frame Series features a specially designed injection-molded front bezel so the display can be flush mounted into kiosks, enclosures or cabinets and improves the dust- and water-resistant seal level significantly. Our high quality display module delivers high-resolution and amazing image clarity. The LED back light not only prolongs the work life, but also decreases power consumption and module weight. Our open frame series has a compact form factor and can be easily integrated with multiple mounting options. Future generation panels can be phased in without external changes. An external AC/DC power supply is included.

Features:

- Multi-point capacitive touch screen optional (M21580C-OF)
- Fully compatible with Windows, Linux, and Mac OS

Applications:

- POP/POS
- Gaming and entertainment
- Kiosk information system
- Light industrial shop-floor automatic operation
