- Light industrial shop-floor automation
- POP/POS

MK101

Elegant design with durable case

The Mimo Mini Kiosk 10.1" was created for retailers in need of an eye-catching counter display that does not occupy too much counter space. The Mini Kiosk is designed with high-quality powder-coated metal case with aluminum border, so it's ideal for anywhere a high quality information display is needed such as on a hotel reception desk, store cashier desk, and more. In addition, it features a printable front acrylic sheet allowing the player to be easily customized with your own graphics.

IPS panel, full viewing angle

The Mini Kiosk features a 1280 x 800 portrait orientation 10.1" IPS screen. IPS LCD screen technology is the most advanced liquid crystal technology. Compared to traditional liquid crystal, IPS screens display brighter, sharper, and clearer images with the widest viewing angle available.

Support Full HD video files

Integrated with an HD media player, the MMK-101 can automatically scale and support 1920 x 1080 full HD quality videos and deliver most bright, sharp and clear images.

Automatic media update function by direct USB access

By simply inserting a USB key into the device, the media files in the Mini Kiosk can be updated automatically. With a secure file required in the USB key, this ensures that only authorized persons are able to change the contents in the MMK-101.

Auto loop video playback

Once connected to power, the Mimo Mini Kiosk will start playing back media files automatically. Media files can be set up by remote control to playback in a loop, in a sequence, or individually.

Users can choose to display photo messages as well with various playback modes, such as fade in fade out, expansion horizontal, expansion vertical, and more. In addition, users can also choose the interval time of between each photo message.

Windows & Android Mini Kiosk

The Mini Kiosk is built to be customized for OEM projects. While the standard product is an HD media player as described within, a mini-PC can be integrated inside for Windows, Linux and Android installations. As mentioned, it features a printable front acrylic sheet allowing the player to be easily customized with your own graphics. Please contact us at 1-855-937-6466 or info@mimomonitors.com for more information on OEM options.
