

FOR IMMEDIATE RELEASE

Mimo Monitors Launches Touch-Free, Temperature-Taking Platform

Stay ahead of the curve with Mimo Monitors' groundbreaking new kiosk that pairs the award-winning Mimo Monitors' display with revolutionary Revel Digital software, ensuring safety and innovation at your disposal

CHICAGO, IL—May 26, 2020— [Mimo Monitors](http://www.MimoMonitors.com) (www.MimoMonitors.com), the experts in small touchscreens, displays and monitors, joined forces with Revel Digital software, to create a vital and cutting-edge solution for the changing times, a touch-free, temperature-taking platform to ensure safety.

Ideal for entrances to grocery stores, office buildings, schools, assisted living facilities and more, this enterprise-grade platform is reliable, flexible, and customizable, to ensure it can optimize for what every business needs. It contains the premium Mimo Monitors hardware display, as well as Revel Digital's CMS analytics and accurate temperature sensing software, along with a one-year license.

Compact, durable, and reliable for seamless installation and intuitive use, the display integrates a medical grade temperature sensor to ensure nothing goes under the radar and everyone entering any building is fever-free.

"With the evolving times, it's more crucial than ever to ensure that your loved ones they places they frequent are safe," said David Anderson, CEO of Mimo Monitors. "We created this solution with ultimate durability, flexibility, and reliability in mind to ensure that this platform promotes safety and can meet and exceed the needs of every business."

Available in wall mount, floor stand standing kiosks, and in sizes 7-32", this comprehensive platform offers various levels of customization and complexity contingent upon the business desires and needs. From providing a simple pass/fail with a non-CMS option to more all-encompassing analytics that include remote management and syncing between locations, the platform's capabilities are wide-spanning. This platform also runs on multiple hardware platforms including BrightSign and Android.
