23.1" Shelf Edge Stretch Display

The shelf edge wide LCD display is designed for on-shelf advertising in supermarkets, grocery stores, liquor stores, clothing stores and other retail applications. The very wide screen makes it easy to display your digital signage content or pricing quickly and easily. You can also configure them using two to six displays. The same content can be displayed on multiple displays or you can have different content playing on the screens depending on your needs. With the very slim bezel, the content can be displayed seamlessly across the multiple displays. Special firmware is required for some configurations, so contact us to discuss details.

Features:

- 23" LED display
- Low operating temperature
- Slim border (4.1mm)
- Anti glare surface
- Durable metal housing
- RAM: 16GB DDR3
- Storage: 1GB DDR3 and 8GB eMMC

Applications:

- Retail shelf edge pricing
- Retail shelf edge advertising
- Multi-shelf digital signage

Multi-screens with identical content

Multi-screens with different content (video wall)
