Vue 10.1" Touch Monitor

The Mimo Vue features a modern zero bezel design and a bright, high contrast, IPS screen. The Mimo Vue is a perfect solution for a wide variety of applications in healthcare, hospitality, retail, education, consumer, and many other industries.

Utilizing single cable USB display technology, the UM-1080 family is our widest viewing angle 10.1" monitor. Available with or without its desktop base, the VESA pattern on the back is available where wall or pole mounting is desired.

Now optionally available with HDMI input for video to supplement where USB video is not supported or inconvenient. The UM-1080CH-G can be installed to almost any platform without drivers. Uniquely, this HDMI monitor still reduces the number of cables. While a typical HDMI touch display will require 3 separate cables, these only require 2 cables. This simplifies connection and makes for a more attractive installation.

Features:

- Surface treatment: Hard coating (3H), anti-glare
- Displays in either landscape or portrait orientations
- 2W Stereo Speakers (HDMI version only)
- Utilizes DisplayLink™ for power and video over single USB connection.
No separate power supply needed
- Fully compatible with Windows, Linux, and Mac OS
- IPS LCD display

Applications:

- Kiosk information system
- Gaming and entertainment
- Light industrial shop-floor automatic operation
- POP/POS
- Video Conferencing
