FCC, CE, ROHS

Open Frame 10.1" IPS USB Monitor

These 10.1" open frame monitors are for applications that will be integrated into other equipment or enclosures. They have long-lasting molded metal product cycle-enclosures and are designed to provide the most cost effective solutions for consumer, retail POS and hospitality markets. Future generation panels can be phased in without external changes.

Now optionally available with HDMI input for video to supplement where USB video is not supported or inconvenient. The UM-1080H-OF can be installed to almost any platform without drivers. Uniquely, this HDMI monitor still reduces the number of cables. While a typical HDMI touch display will require 3 separate cables, these only require 2 cables. This simplifies connection and makes for a more attractive installation.

Features:

- Fully compatible with Windows, Linux, and Mac OS
- Adjustable brightness
- IPS LCD display
- USB 2.0
- Displays in either landscape or portrait orientations
- Utilizes DisplayLink™ for power and video over single USB connection.
 - No separate power supply needed
- HDMI optional

Applications:

- Kiosk information system
- Gaming and entertainment
- Light industrial shop-floor automatic operation
- POP/POS
- Video Conferencing
