## **Caution for safety**

\* Warning : It displays the cases where a mistaken handling may cause an infliction of death or serious injury to a person.

Caution : It displays the cases where a mistaken handling may cause an infliction of physical injury to a person or property damage to a person.

For environment, do not dispose this product to the waste can and make sure to collect in separate disposal.

## **Safety Precautions**

The contents of this manual are intended to protect the user from danger and prevent physical accidents. Please read the entire Safety Section prior to use. Intentional or unintentional changes to the Product or use of the product for a purpose it was not intended is cautioned against. The user that changes or makes modifications to the product not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment and warranty.

## FCC compliance Information

- Note: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
  - (1) This device may not cause harmful interference
  - (2) The device must accept any interference received, including interference that may cause undesired operation.

## Information to user

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, use and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is on guarantee that interference will not occur in a particular installation.

If this equipment dose cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures :

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## Caution

This Class B digital apparatus meets all requirements of the Canadian Interference Causing Equipment Regulations.

Cet appareil numerique de la Classe B respecte toutes les exigences du reglement sur le materiel brouilleur du Canada.

#### (Reference : This image may differ depending on each case for reference only.) Make sure to read the contents before use.

Do not disassemble without authorization and inquire A/S Center for any problem.

- When contacting to the inside, it may cause fire or electric shock.

When there is any strange sound or smoke and odor, pull it off from the cab le immediately.

- It may cause fire or electric shock.
  - Make sure to use the power with the USB Cable (DC 5V) (There is no need for separate power.)

Use the product in a place where there is no inflammation or furnace, or humidity.

- It may cause fire or electric shock.

Do not use the product in close distance from the product with inflammatory substance or combustible spray and others. - It has the risk of fire.

Do not put chopstick, driver or other foreign substance to the inputting area of the product.

- It may cause fire or electric shock.

When the product is cleaned, wipe off with soft fabric, not water mop. - It may cause fire or electric shock by having the moisture to enter into the

- gap of the external part.
- LCD may be damaged if it is scratched or pounded with a sharp object.

Do not install the product in a shaking place or out of reach of children.

- When dropping the product, it may damage to product or a child may cause the product to fall.

## **Product Configuration**

After removing the package of the product, make sure to check if the following components are all present. If there is any missing component, make your inquiry at the place of purchase.

## How to Connect & Use

### **Connect USB Monitor**

Use the USB cable to connect the monitor and PC.

Caution : Only use the provided USB cable to Power your USB Monitor. Alternate cables may not provide the same power transfer and Monitor may not operate properly.

Terminal A (5Pin Min USB) connects the monitor and two terminal B (Serial A USB) to PC.

Note: A single USB connection will provide enough power from most computers. A second USB connection to the PC may be required for computers with older USB specifications.

## **Camera installation (Optional)**

When installing the camera, turn off the power switch on the back before installing.

Caution : If the Web Cam is inserted when the power is turned on, it may not operate property.

Caution : This Monitor is designed to work with a DoubleSight Web Cam only. Use of another Web Cam (or another Device) may result in damage to your Monitor.

## Minimal requirement of system

CPU	Intel Pentium/Celeron,AMD/K6/Athlon/Duton 1.2Ghz
RAM	512MB RAM or more
USB Port	2 or more of USB2.0 (It is recommended to use two with the difference of some PC spec.)
HARD Disk	Spare space of 50MB or more
Supporting OS	The OS spec of PC can be confirmed from the 'General' tap of the system registration information window by selecting the 'attribute' with the right button of the mouse in 'My Computer' on the 'base screen. (1) Windows XP (32bit: Support, 64bit: Not support) - Service Pack 1 and previous version: Not support - Service Pack 2 and following version: Support (2) Windows 2000 - Service Pack 3 and previous version: Not support - Service Pack 4 and following version: Support (3) Windows Server 2003: Not support (4) Windows Vista: Support (32bit or 64bit support) (5) MAC OSX (Intel MAC) Require separate program (6) Windows 7 (32bit or 64bit support)

## **Driver Installation**

## **Driver installation**

- When the PC booting is completed, begin installation after connecting the USB cable.
  - 1. You can see the right screen when you insert CD into CD-ROM.
    - (1) Monitor & Touch Driver Installation
       Double click to install USB monitor driver.
       \* ? Please check your model name.
    - (2) User's manual Double click to see the user's manual.
       \* Please refer to Help unless you can see the user's manual.
    - (3) Supporting OS
       Double Click "Supporting OS" menu bar to check OS compatibility.

Note: If your PC has an OS which is not supported, you will not be able to complete the installation. `

2. Select your language and click "I Accept".

3. Installation screen appears.

## **USB Monitor Restrictions**

#### Support spec

- This monitor is the USB monitor recognized as the USB device that the DOS screen shown in the PC booting will not be displayed.
- SW that uses the 3D acceleration function in HW cannot be used in the USB monitor. Real Player (Do not support the extension mode.)
  - Most of 3D game
  - Program driven by the basis of Direct X
- Supporting moving picture program
  - Power DVD
  - Win DVD (supporting version 5 or higher)
  - Windows Media Player (supporting Version 10 or previous version)
  - VLC
  - Gom Player
- On USB 1.0, the USB monitor may not normally operated.
- The power at USB 1 Port is weak that it may not be operated in some PC that it is recommended to use 2 USB Ports.
- PC H/W spec possible for extension
  - Connect 2 USB monitors: Minimum of 1.2GHz CPU / 512 MB Memory
  - Connect 3 USB monitors: Minimum of 1.8GHz CPU / 1 MB Memory
  - Connect 6 USB monitors: Minimum of 1.6GHz Dual core CPU / 512 MB Memory

## Symptoms for possible problems and responses

• When there is any problem, make sure to check the followings first.

#### Q: The USB monitor screen is not displayed.

- A: (1) Check if the USB cable is correctly linked and if the USB Driver is installed.
  - (2) Check if the blue LED color on the USB monitor is come on and if the power button is turned Off.
  - (3) Check if the tray monitor icon on the lower side of the monitor has 'Off'.
  - (4) The USB monitor reads the general USB device on the PC. If quick and repeated turning on and off is made, the USB vice may have problems that you may refer to problem solving method for the USB device from the Customer Support site of Microsoft.
    - Press the right button from "My Computer" of the base screen to display the 'Attribute' window.
    - Click the system administrator.
    - Press the HW change search from the motion menu.
    - Re-boot the PC.

#### Q: The screen on the USB monitor has stopped its motion.

- A: Booting is not made after linking the USB monitor.
  - (1) In the PC with on-board type that uses the i815 chip set mother board has to re-boot by changing the legacy USB support option to [No Change] at the BIOS set menu.

\* The entry method of BIOS may differ depending on the PC that the manual of the PC in use has to be referred to. For detailed information, refer to the homepage of Microsoft.

#### Q: How can I remove the installed program of the USB monitor?

A: Select Program 'Add/Remove' from the control board to select the Displaylink Graphics from the list of 'currently installed programs' and click "Remove" to delete.

#### Q: Touch Screen doesn't work.

- A: (1) After reconnecting USB cable, please check out the "USB Connection" icon on touchside. \* If there is no icon, reconnect USB cable and on again.
  - (2) When you change USB port or calibration get twisted, click 'Touchside Tool 4Points Calibration" and reset calibration.
  - (3) Reboot PC after driver installation.

- Q: When you use Skype video chat with Window XP OS, there may be flicker or distortion in screen.
- A: The use of DirectX function causes this symptom. Make sure not to use it on the graphic card setting because there is no option to disable this function on SKYPE.

#### **OS: Windows XP**

- (1) On the desktop, right-click to display 'Display Properties' window.
- (2) Click 'Settings' tab and click Advanced (V).

- (3) Click 'Troubleshoot' tap.
- (4) Set 'hardware acceleration (H)'to None, and click 'Apply (A)' button.

#### **OS:Windows Vista**

(1) Select program 'Cumstomize colors' from the control panel
