

7" USB Resistive Touch Open Frame Display

UM-760RK-OF

Super slim USB-driven LCD monitors are a friendly and affordable way to add a display to any computer or interface system.

7" USB Resistive Touch Open Frame Display

The same 7" resistive touchscreen Monitor from the UM-760R, but now available in open frame for applications that will be integrated into other equipment or enclosures. Same slick design features as our popular 760R model, with the same resistive touchscreen. The screen can display in either landscape or portrait orientations. The UM-760RK-OF open frame touchscreen monitor is designed to provide the most cost effective solutions for consumer, retail POS, and hospitality markets.

Features:

- Utilizes DisplayLink™ technology that provides video, touch and power over a single USB connection. No separate power supply to worry about
- Rigid metal frame
- Ultra-light, weighs less than 1 pound
- Generally used for OEM systems where a built in touch screen is desired
- Mechanical drawings available upon request

Applications:

- POP/POS
- Secondary screen for productivity
- Gaming and entertainment
- Light industrial shop-floor automation
- Digital Signage
- Video Conferencing
