

Product Specification / Data Sheet

Item: 12ply High Density Square Mesh Netting

Options Available:

Mesh Sizes: 40mm Square Mesh

Bundle Sizes:
25m x 25m

Colours: Black

General Information:

Our 12ply High Density Polyethylene Knotted Netting is a 1st Grade, light weight, high strength netting suitable for permanent Pond / Bird / Duck Control installations. The 12 ply, large mesh size & Black colour design ensures the netting is very unobtrusive.

This netting is simple and efficient to work with. Being a square mesh design, it can significantly reduce installation times and labor costs. This netting won't pull or stretch in either direction, which allows for precise installations in warehouses and factories. It's hard wearing properties also make this netting an ideal choice for use as a pond, pool or boat covering netting.

This netting has been specifically designed for covering aquaculture ponds. The principal function of this netting is to stop the larger birds entering the pond space. The smaller birds 'can' still enter, however they are generally of no concern to the fish.

Applications:

Pond and dam covering net
Pond and Pool Cover netting
Duck exclusion net
Boat Cover Netting
Warehouse / Factory Bird Control
Commercial Bird Netting Application
Domestic Sheds and Verandah bird control netting

Other:

Safety applications
Waste Control netting
Barrier netting
General Purpose

Technical Specifications:
