

## Product Specification / Data Sheet

**Item:** 10m x 6m : 100mm SQ / 4mm Diameter

### Options Available:

**Mesh Sizes:** 100mm

**Bundle Sizes:** 10m x 6m, 15m x 15m

**Colours:** Blue

### General Information:

Our 4mm BRAIDED High Density Polyethylene Knotted Netting is a professional Grade, UV stabilised, high strength netting suitable for permanent indoor and outdoor installations. The durable and robust manufacture ensures the netting is designed to last, even in trying environmental conditions.

This netting is simple and efficient to work with. Being a square mesh design, it can significantly reduce installation times and labor costs. This netting won't pull or stretch in either direction, which allows for precise installations.

### Applications:

#### Cyclone Netting:

A strong, heavy duty netting used as a tie-down net in Cyclonic conditions. The double corded border gives additional tie down strength.

#### Pool Cover:

Residential pool covering net to prevent children and pets falling into pools and or ponds. The double corded border gives additional tie down strength.

Please be aware that netting is not a legal alternative to pool fence legislation. A netting cover is not a valid "sole" pool exclusion option. It should be used in addition to your current requirements in terms of pool enclosure safety.

#### Sporting:

Residential, club and commercial grade sports barrier Netting Suits: (netball/ Soccer / Basketball / Football / AFL etc)  
Will stop most balls ranging from netballs, basketballs, soccer and footballs.  
Soccer Goal netting replacement / custom net

#### Other:

Safety applications  
Waste Control netting  
Barrier netting  
General Purpose

Manufacture: 4mm Braided High Density Polyethylene

Mesh Size: 100mm x 100mm

Twine Thickness: 4mm with a Double Cord Border

GSM: 135

Twine Breaking Strength: 150 KGF

Note: This does not relate to the overall weight capacity of the net, and are indicative of individual strands only.

### Key Performance Specifications:

UV Stabilised

Double Cord Border

Square Mesh Design

Knotted / BRAIDED Construction

HDPE will not absorb water, therefore not changing the properties of the netting during inclement weather.

### Related Information:

Bulk and Wholesale inquiries are welcomed on this range of product.

This netting is made from durable, UV treated High Density Polyethylene. As opposed to many other load containment nets in the market, this netting features a BRAIDED construction. This ensures a higher strength net, which also offers excellent abrasion resistance under strain.

Our Cyclone net's also feature a Double Looped edging (4mm + 4mm = 8mm), to ensure maximum strength at the main connection (tie-down) points.

Our Quatra branded 4mm HDPE BRAIDED square Mesh Knotted net is a leading product for specification into tenders and construction designs throughout Australia and New Zealand.

As testament to its reliability and quality, Quatra Brand nets are the selected netting of over 30 installers and resellers throughout Australia and New Zealand.
