

## PRODUCT SPECIFICATION/ DATA SHEET

### Item:

## Fruit Fly Netting

### Options Available:

- Mesh Sizes: 5m x 7m, 10m x 7m, 20m x 7m
- Colour: White

### General Information:

Fruit Fly Netting is an ongoing problem in both home gardens and commercial facilities. Quatra branded Fruit Fly Netting is a premium (pesticide-free) and Wildlife Safe exclusion net designed for the following usage:

- Fruit Fly Protection Netting
- Insect Exclusion / Insect Netting
- Crop Protection
- Bird Netting
- Microclimate / Shade / Evaporation
- Snail and Slug Netting Exclusion

Haverford provide a very high quality (103GSM) Fruit Fly Netting which is designed to last in harsh Australian conditions. The construction involves a strong lengthwise row pattern, with additional thatched weaves in-between to reduce the effective hole size. The product also features a selvedge edge of 50mm for additional strength where attaching.

Netting Exclusion is a preventative method that uses physical barriers to stop fruit flies from reaching your fruit and vegetables.

### Applications:

- Orchards (commercial and residential)
- Vineyards
- Vegetable Gardens
- Backyard Fruit trees

### Technical Specifications:

- Construction: HDPE Monofilament
- Colour: Translucent (White)
- Edging: 50mm Reinforced Selvedge Edge
- Overall Bundle Size: 20m x 9.9m
- GSM (Grams per Sq Metre): 103
- Other: UV Treated

### Technical Properties:

Technical PROPERTIES independently tested by Standard Test Method (ASTM D 5034 ) for Breaking Strength and Elongation of Textile Fabrics:

#### TEST RESULTS : (Warp/Weft)

- Tensile Strength: 681.0N/320.4N
- Elongation : 32.6%/115.4%
- Bursting Strength: 610.0N
- Tearing Strength: 267.0N/158.4N
- Selvedge: Reinforced 50mm

### Relation Information:

Our netting was independently tested at a certified testing & research institute.
