

PRODUCT SPECIFICATION/ DATA SHEET

Item:

Knotless Polyester 22mm / 3.5mm

Options Available:

- Mesh Sizes: 22mm
- Bundle Sizes: 10 x 4m
- Colour: Black

General Information:

Our 3.5mm (200ply) Knotless Polyester Netting is a professional Grade, UV stabilised, high strength netting suitable for permanent indoor & outdoor installations.

The durable and robust manufacture ensures the netting is designed to last, even in trying environmental conditions.

This netting is simple and efficient to work with. Being a square mesh design, it can significantly reduce installation times and labor costs. This netting won't pull or stretch in either direction, which allows for precise installations.

Applications:

Safety

- General safety where soft feel knotless is required
- Adventure Playground

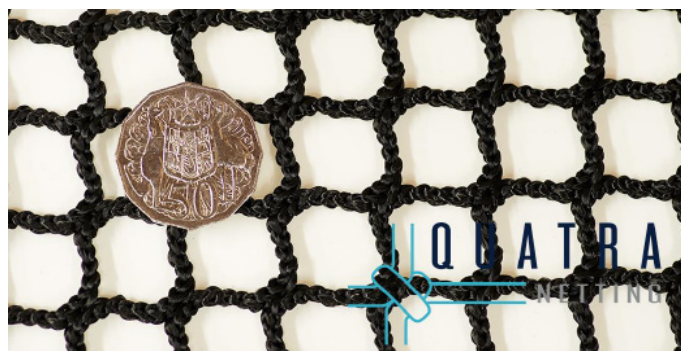

Other

- Golf Impact Netting
- Catamaran Netting
- Barrier netting
- General Purpose

- UV Stabilised
- Square Mesh Design
- Knotless Construction

Related Information:

Bulk and Wholesale inquiries are welcomed on this range of product.

Polyester has less stretch/elongation in comparison to Nylon, so will retain its shape (tautness) over time in tensioned applications where force will be applied.

Our Quatra branded 3.5mm (200ply) square Mesh Knotless Polyester net is a leading product for specification into tenders and construction designs throughout Australia and New Zealand.

As testament to its reliability and quality, Quatra Brand nets are the selected netting of over 30 installers and resellers throughout Australia and New Zealand.
