# WHO WE ARE

With over 25 years' experience in civil infrastructure, we know how to deliver high quality contracts. We're a full service civil contracting company, with the technical and management skills, resources and quality plant and equipment to make projects happen.

Since being established in 1993, we've built a solid reputation as one of Auckland's most reliable contractors. We undertake a wide range of construction contracts, often in challenging environments and for high profile clients with exacting standards.

We currently employ in excess of 110 skilled and diverse staff of all age groups and from all ethnic and social backgrounds. Our project managers, surveyors, foremen and operators have the skills and experience to undertake any job – large or small.

This team is backed up by the latest in plant and equipment, including GPS excavators and our own fleet of trucks, operating from our head office in Takanini.

While big enough to take on the largest of projects, we still offer a personal service. Our senior management team is approachable and ready to make decisions when you need them to.

We are committed to collaborating with and doing our best for our clients. We work together with you to deliver your project, solve problems, and find solutions that give you value for money.

## WE OFFER:

- The full range of civil contracting services for your project
- The capability, resources and modern plant and equipment to undertake any job, large or small
- One size does not fit all – we have the flexibility to adjust our programme, resources and approach to meet your requirements
- Excellence in project management and planning
- An impeccable record in and commitment to health and safety and the environment.

# WHAT WE DO

## SUBDIVISIONS

Whether it's a small 15-lot residential, a retirement village or a major housing development running into 100s of lots, we have the resources and plant to develop all infrastructure necessary for your next subdivision.

## DRAINAGE

We are one of the largest self-performing drainage companies in Auckland, and are frequently engaged as head contractor on large stormwater and sewer projects. Drainage is often an integral part of many large projects, so our capability means we can also complete several other facets of the project.

## BULK EXCAVATION

This complex work requires a contractor with expert planning skills, strict environment controls and a fleet of trucks on hand to seamlessly remove excavated matter, including contaminated materials. We are widely recognised for our expertise in this field, having worked on many large projects over the years.

## ROADING

We offer a complete range of services for main arterial routes as well as smaller roads and urban streets. It could be reinstating the road following a drainage or utilities installation; or the complete construction of a road corridor.

## EARTHWORKS

We're specialists in earthworks, and have the capability, capacity and equipment to meet jobs ranging from precise foundations to large projects requiring the removal and disposal of thousands of tons of a variety of materials. A key strength is working around obstacles and manage and dispose of contaminated materials.

## SITWORKS

We're a contractor of choice for many large building companies. We prepare building platforms and pour footings and foundations, we construct footpaths, erect fencing, install drainage and develop car parks and loading yards. Jobs range from small commercial developments to extensive car parks.

## WATERMAIN & UTILITY SERVICES

Our capability is in demand for major projects for councils and Watercare Services, and on new subdivisions. We've installed and replaced water mains, installed ducts for utilities, power and telecommunications. No job is completed without our stringent quality checks and testing.

## STRUCTURES

No structure is too small, large, simple or complex. We construct all types of retaining walls, box culverts, bridges, canopies, outlets and ponds, stormwater tanks and pump station structures. We've also added weirs and boardwalks to our capability.

## LANDSCAPING

Our skilled team works with urban designers and developers to follow and complete intricate designs for commercial, public and private developments. We cover all aspects of hard landscaping and streetscapes, including specialised paving and concrete, walls, drainage and planting.

# HOW WE OPERATE

**FULLY CERTIFIED TO ISO STANDARDS:** Quality, Health & Safety and the Environment are at the cornerstones of our business. We have robust systems and procedures and an embedded culture within the company to ensure we deliver our projects safely, to a high standard, and without harm to our environment. Our management systems are fully certified to ISO standards.

**HEALTH & SAFETY:** We are committed to ensuring our staff go home unharmed each day, and that visitors to our sites are safe. We have a flawless record in health and safety with no serious harm incidents in over 25 years' service.

**QUALITY:** We have a proven track record of high calibre workmanship and management, and we stand by our work. We never 'hand over the key' until we're completely satisfied.

**ENVIRONMENTAL:** We are committed to environmental best practice. Each year, we set environmental objectives as part of our commitment to meeting the highest standards in the construction industry.

**SUSTAINABILITY:** We're a contracting company that embraces sustainability – environmental and social. We invest in our workforce through apprenticeships, school internships and skills training. This commitment is reflected in our approach to project delivery, including a goal to send zero waste to landfill on our projects.

**PROJECT MANAGEMENT:** Whether it's an operational hospital or airport, busy arterial road, or tightly constrained inner-city site, our experienced project managers plan rigorously to meet the most challenging of deadlines.

**SKILLED TEAM:** A successful project needs the best possible team of managers and operators. Our contract teams have decades of experience, finely tuned skills and the contract management know-how to deliver.

**PLANT AND EQUIPMENT:** We are one of the best equipped, local infrastructure companies in the region. Our extensive fleet includes modern well-maintained plant and GPS excavators, trucks, and equipment to tackle almost any project.

**OUR CULTURE:** We are more than just a business – we work together as a large team to embrace cultures, values and backgrounds. We are committed to improving diversity in the workplace, and provide equal opportunities, no matter the race, age, gender or nationality.
