DIY Hydrating B5 Gel

So you like that famous Hydrating B5 Gel, but don't like the cost? Here's a formula sure to please your skin and your pocketbook! Our formula contains Sodium Hyluronate (aka Hyaluronic acid) and dl-panthenol (pro-Vitamin B5) and is preserved with Leucidal Liquid, a natural preservative.

This is such a simple formulation, we have provided a Measurement Option if you do not have a scale.

Formula

	Percent	Grams	Ounces by Weight	Measurement Option	Ingredient
Single Phase	91.0	91.0	3.200 oz	3.2 fluid ounces	Distilled Water
	5.0	5.0	0.176 oz	1 level teaspoon	dl-Panthenol
	3.0	3.0	0.105 oz	34 teaspoon	Leucidal Liquid
	1.0	1.0	0.035 oz	1 level teaspoon	Hyaluronic Acid

1. Combine Distilled Water, dl-Panthenol and Leucidal Liquid and stir until dl-Panthenol is fully dissolved.

2. Sprinkle Hyaluronic Acid on surface of water and mix well with paddle mixer until mixture is smooth and evenly hydrated (this can take up to 45 minutes). Alternately, you can sprinkle the Hyaluronic Acid on top of and the water, mix it in and let it sit for up to 3 hours to fully hydrate and then mix it again until the mixture is thick and of a uniform consistency. With either method, white clumps or streaks of Hyaluronic Acid powder will disappear and the mixture will thicken when it is fully hydrated.

Makes approximately 100 grams or 3.5 ounces of serum.

INCI: Water, Panthenol, Leuconostoc/Radish Root Ferment Filtrate, Sodium Hyaluronate
