STATEMENT 13 094 10

(In accordance with EN 45014 General criteria for supplier's declaration of conformity)

REGULATION: California Proposition 65

The Safe Drinking Water and Toxic Enforcement Act of 1986

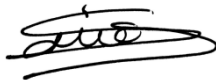

The Proposition was intended by its authors to protect California citizens and the State's drinking water sources from chemicals known to cause cancer or reproductive toxicity.

The undersigned, Mrs Sophie Dinand, Cosmetic Regulatory affairs Manager, hereby certifies that from our current knowledge of the raw materials and the process, the products listed in annex and commercialized by SEPPIC, do not contain any substances listed under Proposition 65 above the safety limits given by OEHHA, when existing, at the recommended dose level.

A warning about listed chemicals known to cause cancer ("carcinogens") is not required when we can demonstrate that the exposure occurs at a level that poses "no significant risk" or because we can demonstrate that the discharge will not cause a "significant amount" of the listed chemical to enter any drinking water source, and complies with all other applicable laws, regulations, permits, requirements, or orders: <http://oag.ca.gov/prop65/faqs-view-all>

This is the responsibility of the manufacturer of the finished product to assess its exposure levels according to the final formula and the use types.

This certificate was established to the best of our knowledge and/or according to our suppliers' statements, at the date of this certificate. It is however your responsibility to abide by any clause of any regulations, which may apply to the product that you manufacture, or to the use you make of our product.
