Luscious After Bath Oil

Lotioncrafter LC995 Cyclomethicone can be combined with virtually any oils you choose, along with a little Vitamin E (as an antioxidant for your oils) to make very nice after bath oils that glide on the skin and sink in quickly with no greasy feel. **Lotioncrafter IPM** is an emollient ester that improves the spreading co-efficient of the oils. Due to the high volume of oils in this formula, it can be slippery on the bath or floor, so care should be taken in use (and your bottles labeled appropriately if you are selling your product).
