Section 4 – First Aid Measures

4.1 Description of First Aid Measures	
Ingestion	If accidentally swallowed, give 2 to 4 cups of water, observe victim for 24 hours; seek medical attention if indicated. If vomiting occurs, keep head lower than hips to prevent aspiration.
Skin	For skin contact, wipe away excess material with dry towel. Then wash affected area with plenty of water, and mild soap if available, for several minutes. Get medical attention if irritation occurs.
Inhalation	If inhaled, remove from area to fresh air. Get medical attention if respiratory irritation develops or if breathing becomes difficult.
Eyes	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention if irritation occurs.
Note to physician	Treatment based on sound judgment of physician and individual reactions of patient.

Section 5 – Fire Fighting Measures

5.1 Method	The test method used is listed as closed cup (PMCC TCC) or open cup (COC): COC
5.2 Flammable Limits in Air – Upper (%)	Maximum % by volume of vapor in air above which propagation of flame does not occur on contact with a source of ignition: N/C
5.3 Sensitivity to Mechanical Impact (Y/N)	No
5.4 Sensitivity to Static Discharge	Sensitivity to static discharge is not expected.
5.5 Extinguishing Media	Water fog, carbon dioxide, foam, dry chemical
5.6 Special Fire Fighting Procedures	Fire-fighters should wear self-contained breathing apparatus and full protective clothing when fighting chemical fires. Use water spray to cool nearby containers and structures exposed to fire. Containers can build up pressure if exposed to heat (fire). Fire involving large amounts of material should not be approached because individual containers may rupture abruptly causing “fireball” effect.
