From our Formulary Perfumed Lotion Bar

Lotion bars are an ideal way to incorporate fragrance into solid emollient products. This formula uses IPM to reduce the greasiness typically found in these vegetable butter and oil based products. It provides enough hardness to enable them to be poured into stick-type product dispensers, but can also be poured into jars if desired. Hardness can be adjusted by varying the ratio of beeswax to liquid oils.

Formula

	Percent	Grams	Ounces	Ingredient
Phase A	23.1	100	3.3	Beeswax
	23.1	100	3.3	Shea Butter Refined
	23.1	100	3.3	Mango Butter
	11.6	50	1.65	Abyssinian Oil
	11.6	50	1.65	Meadowfoam Seed Oil
	4.7	20	0.67	Lotioncrafter IPM
	0.5	2	0.07	Vitamin E Mixed Tocopherols T50
Phase B	2.3	10	0.3	Fragrance (adjust to suit)

- 1. Combine and heat Phase A ingredients in a pot. Bring to a temperature of about 150°F and stir to combine all ingredients well.
- 2. Remove from heat. Cool to approximately 130°F. Add Phase B with stirring.
- 3. Pour into lotion bar containers.

Makes approximately 432 grams (14.24 ounces).
