## HOW TO ASSEMBLE

Secure the hanger bracket to ceiling beam or a suitable piece of timber inserted between the ceiling beams. The bracket be attached with two (2) long wood screws as supplied within the package.

### DOWNROD MOUNT

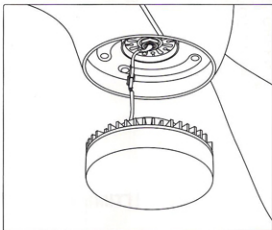

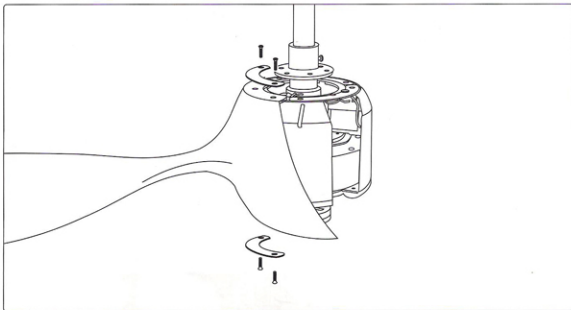

- Obtain fan motor.
- Remove cotter pin and bolt from yoke.
- Loosen jam screw in yoke until it is flush with the inside surface.
- Obtain downrod and canopy (and yoke cover (optional)).
- Place downrod inside canopy (and yoke cover (optional)).
- Route wires and safety cable exiting motor through canopy and downrod.
- Insert bolt through hole in shaft and downrod. **"Be careful not to damage or cut the fan wires."**
- Secure bolt with cotter pin.
- Secure downrod in position by tightening jam screws and lock nut.
- Place motor housing onto motor top
- Slide yoke cover (optional) over yoke

**NOTE:** All set screws must be checked and re-tightened where necessary, after installation.

## INSTALLATION INSTRUCTION

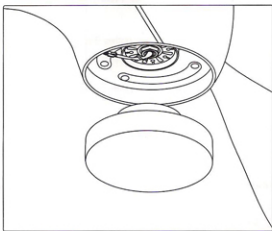

Align the holes on the blade with motor and screw on with the screws and metal pad provided.

With light & without light (option)

- 1) Connect the motor plug with LED light' plug.
- 2) Install the "LED light and silicon ring" aligning with adaptor.

**Warning:** turn off the electrical mains at the circuit breaker fuse box.

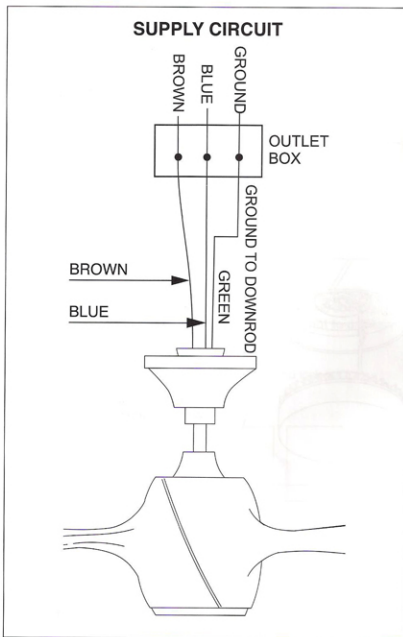

Install the "no light cover & silicon ring" aligning with adaptor.

**Warning:** turn off the electrical mains at the circuit breaker fuse box.

## CIRCUIT DIAGRAM

### REMOTE CONTROL(OPTION)

This fan is equipped with a canopy type remote control unit for controlling the fan speeds and light kit, please refer to the instruction sheet packed with the control unit for more information about the wiring and installation.

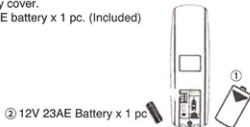

**NOTE:** Once ground wires are connected, carefully tuck wires and marrette into the metal outlet box making sure that the wires are clear of the hemisphere and downrod when positiond in mounting bracket.

## REMOTE SETTING

### Battery installation on back side of Transmitter

- ① Remove battery cover.
- ② Install 12V 23AE battery x 1 pc. (Included)

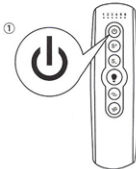

### SETTING before starting fan.

**Note :** Do not press any other button on the transmitter before setting as it will cause the procedure to fail.

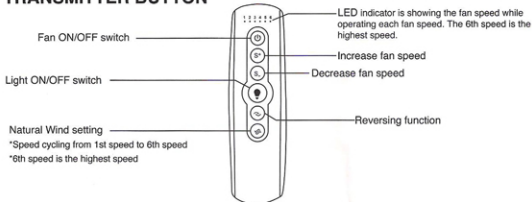

- ① Pressing the button "⏻" for over 5 seconds till the receiver makes Bi-Bi sound. This fan has completed frequency setting.

#### IMPORTANT:

In event of no Bi-Bi sound (fan is failed for setting), do the following step for re-setting :  
Switch off the main power and wait for 10 seconds, then switch on the power again and do the above setting again.

### TRANSMITTER BUTTON

**Your fan is ready for operation now.**
