

## Cut Chart

---

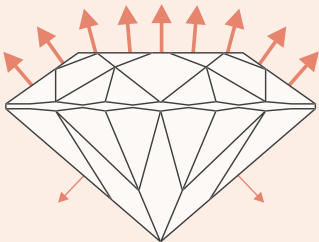

### **SUPER IDEAL**

Cut to the highest standards, these diamonds have the most desirable dimensions and are proportioned to return the maximum light possible. Fewer than 1% of all diamonds can be graded as Super Ideal.

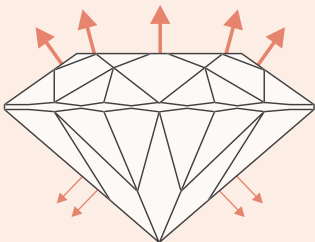

### **EXCELLENT**

Exquisite quality cut to create the optimal combination of brilliance, fire and sparkle. Reflects nearly all light that enters the diamond. This rare cut represents the top 3% of diamond quality based on cut.

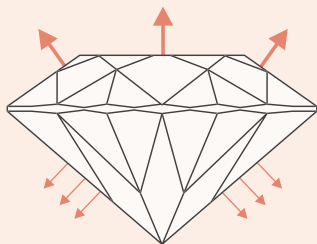

### **VERY GOOD**

Superior quality cut that reflects nearly as much light as the excellent cut while at a lower price. This cut makes up roughly the top 15% of diamond cut quality.

### **GOOD**

Premium quality cut to reflect most light that enters and to optimize the size without sacrificing quality or beauty. This cut represents about 25% of diamond quality based on cut.

### **FAIR**

This quality is cut to reflect some light while maximising weight and can appear dull. Diamond Exchange does not offer this cut grade.
