

SEA (Survival Egress Air) is a compact compressed air system. An emergency air source designed to assist in an underwater egress emergency. The system has remote mouthpiece for hands-free operations and unrestricted head movement. This system is perfect for aviators, crew and passengers who fly over water and for other applications that require an emergency breathing device.

**Features**

- Marine grade brass first stage body
- Color coded dial indicator for remaining air supply
- Valve “on / off” visual indicator
- 360° first stage swivel connection
- Second stage with flexible braided hose
- Left and right hand neutral second stage
- Mouthpiece adjusts to 6 different positions
- Hand removable second stage
- Attachable nose clip (optional accessory)

**Specifications**
