CHROMOTHERAPY

Chromotherapy, also known as color therapy, is an alternative medicine treatment in which colors are used to reduce swelling, relieve pain, decrease inflammation, accelerate open wound healing, and significantly reduce overall recovery after medical or surgical procedures.

Chromotherapy can be applied in everyday life, from the clothes we wear to the decoration of our homes, and why not, during sauna sessions. This vibrant antidote promotes relaxation, healing, and harmony. Bring a healing method that has been practiced for over 2,000 years into your own home.
