# WHY MY SAUNA HEATER NEEDS ROCKS

- High Structural Density, resistant to shattering and early erosion
- Visually pleasing 3 inches to 5 inches rough diameter, provides a natural feel to the sauna environment
- Sourced from select rivers and beaches in México, North America
- Reduces wear and tear on the Sauna elements, increasing sauna heater longevity
- They contribute to the heating of the sauna
- They vaporize the water that is poured on them
- They provide humidity to the environment
- Release mineral vapors that benefit the respiratory system and skin

## OPTIONS

### Lava Rocks

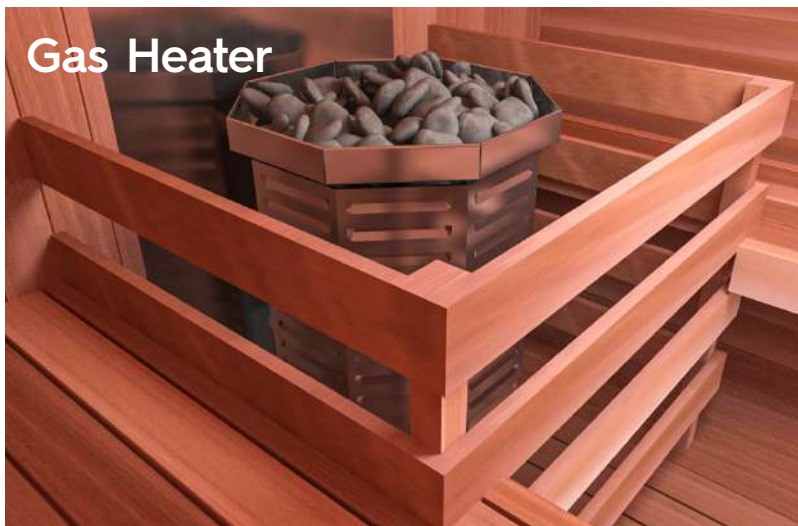

- Thanks to their pores, they tolerate high temperatures very well
- They absorb more water, which prolongs the experience

## Red Rocks

- Air and steam circulate better between these types of stones
- They absorb less water, which generates more steam
