SAUNA WINDOW PLANNING GUIDE

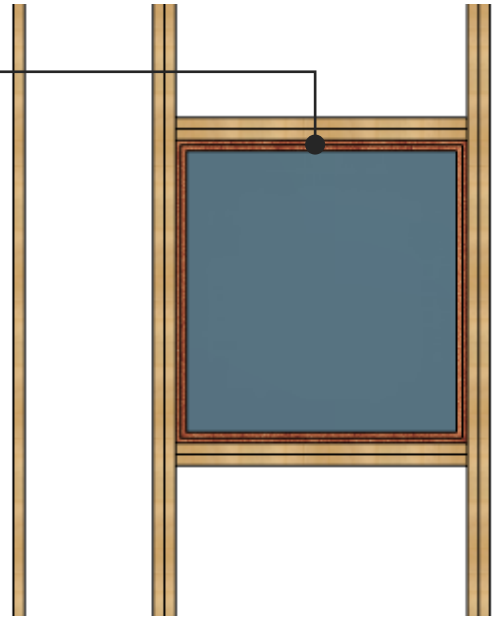

Windows are an excellent addition to a sauna to provide more visibility from the outside and more light to the inside. To plan out a sauna window, start with your desired window size.

Lets plan on a 37" x 38 1/2" Window (GLASS).

We will need to frame in our rough opening an 1 1/2" bigger in each dimension.

This will account for our window jamb and a small clearance gap.

Window Casings are applied after the Tongue and Groove panels are on the wall!
