

# HIMALAYAN SALT PANEL HANDLING INSTRUCTIONS

1. All Salt Frames **MUST** be carried frame-side up with both hands supporting the salt bricks underneath (image above).
2. If your Himalayan Salt Panel Frames include integrated LED lights be sure the LED light strips are protected and free from anything that could potentially cut/nick the LED strip.
3. Himalayan Salt Panel Frames should always be placed salt face down unless you have something supporting the backside (frame-side) of the panel.
