

J Pro

UVI Soundpacks

Buying a Pro Grand Fretboard or a Pro Grand Clavier gives you access to a special UVI soundpack, as well as a €50 coupon for UVI Falcon.

To download your UVI soundpacks, please send us an email at: support@jouemusic.com with your pad (Pro Grand Clavier or Pro Grand Fretboard) serial number.

How to get my pad serial number?

Connect your Pro Board to a computer, place the pad on it, and in the Joué Editor press ALT + click on the pad.

How to install my soundpacks?

The Joué soundpacks can be used with UVI workstation or UVI Falcon.

Download UVI Workstation for free [here](#) and follow the following installation procedure.

1) Launch UVI Workstation.

2) Connect your Joué Pro to a computer.

3) Click on "Files" and select "Audio and MIDI settings", then select "Joué Play" on the Port A and click on "OK". (Press "Refresh MIDI Devices" if "Joué Play" doesn't shows up).

Click on the navigation icon, then on the preferences and go in the "soundbanks" tab to set up the path of the file (add and select the folder where the .ufs file has been placed).

Click on "OK" and restart UVI Workstation.

Now, the Joué soundpack should appear in the soundbanks navigator, double-click on a preset to use it, and play!

For each preset, you will see macros that have been setted up especially for Pro Pads controls.
