

SERVICE TRAILER

SELF BUNDED LOW PROFILE DUAL AXLE

SKU: TRAILER-SERVICE

CEA Petroleum designs and manufactures an innovative range of self banded, low profile, self banded service trailers. Based upon our popular range of self banded fuel trailers, the CEA Petroleum Self Banded Service Trailer is the perfect support tool for your mobile equipment. CEA Petroleum Self Banded Service Trailers can be configured with a wide variety of dispensing, metering

and filtration equipment allowing you to customise the trailer to suit your specific site requirements.

The CEA Petroleum Self Banded Service Trailer design stands up to the rough and tumble treatment afforded by customers in the Construction, Civil Contracting, Contract Mining, Mining, Oil and Gas, Drilling and Exploration industries.

PRODUCT FEATURES:

- **Self Banded** - True self banded, tank in tank design.
- **Fully Approved** - designed and approved to meet the requirements of AS1692, AS1940 and Australian Dangerous Goods Transport Regulations.
- **On Board Compressor** - Peerless or Compak electric start diesel driven air compressor. The onboard compressor provides power for the dispensing equipment, tyre inflation and to run site air tools as required. A solar panel is provided to recharge the battery powering the electric start for the diesel driven compressor
- **Tried and Proven** - since inception we have supplied more than 150 units of differing configurations into the Australia, and indeed global, markets.
- **Heavy Duty** - designed for on and off road application - beware of cheaper imitations !!
- **Removable Inner Tank** - The primary tank modules can be removed for maintenance
- **Separate Tank and Trailer Chassis** - the secret of our success, our tank body is protected from the twisting and rigours associated with off-road towing and use. Our chassis is designed to take the mechanical stresses and strains of in field use, protecting the tank body from the risks of cracking over time.
- **Pump Bay** - drawbar mounted, fully banded, weatherproof, pump bay housing. The banded pump bay has been designed large enough to store the electric start diesel driven compressor, grease dispensing equipment and other site support equipment. We can engineer a range of pump bay solutions including side mounted with gull wing doors
- **Dispensing Options** - common dispensing options include Air Operated and 12V Solar.

SERVICE TRAILER

SELF BUNDED LOW PROFILE DUAL AXLE

- **Baffled** - our self banded tank modules are fully baffled ensuring stability when towing loaded.
- **Roof Mounting Options** - The trailer roof allows for mounting of Spill Kit or Solar Panels
- **Grease cartridge cupboard** - weather/dust proof configured for storage of grease cartridges and an air operated grease gun
