

RECOMMENDED USE

We recommend using a loading dose of 2 capsules twice per day for the first 90 days to initiate the mitochondrial rescue.

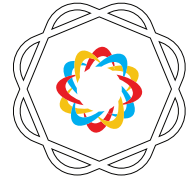

After 90 days you may reduce your dose to 2 capsules divided into AM/PM doses.

Brain ResQ™

CUSTOMERS ARE SAYING:

I liked the price for your product, whose stunning ingredients list is nothing short of a lineup of: **“WALK-OFF—HOME RUN HITTERS!”** The effects on my brain have been nothing but miraculous! If this first week of writing is any indication, I know I can finish writing my book in half the time!!!
—Claude Anderson

Brain ResQ is helping me lot. Before my brain used to be foggy and was not able to think clear. I do not have that problem now. It's a good vitamin.
—sukhdev k gill

I feel so good on this product. I decided to also buy some for my 88 year old mom, and she says she started feeling younger!
—diana collins

This product has **really good ingredients for helping to power up your mitochondria** and it happens that I've been taking those ingredients individually. Having them combined into one capsule is a nice benefit.
—K. Salinger

The supplement contains several nutrients that are currently being researched for their **anti-aging properties**. I read some of the research summaries and it almost sounds too good to be true. I am particularly interested in PQQ because it may help build bone and prevent osteoarthritis. The other nutrients in here also have multiple benefits, and some of them work best together.
—Colinda

This gives you allot of supplements you do not have to buy separately, which I have been doing. The K2 Mk7 takes the calcium from your arteries to your bones and teeth. Calcium is good to take, but it doesn't always go in your body were it belongs. If you have calcium blocked arteries it can cause a heart attack, and also cause your brain fog. Co-q-10 is needed if you take a statin for cholesterol. Resveratrol is good for your heart, as that is what is in a small glass of wine. **This combination gives you a clearer mind** to think.
—Great Cook

Pyrrroloquinoline Quinone: PQQ is an essential nutrient that your body can not synthesize. Growing research indicates PQQ's unique ability to rescue and regrow mitochondria.

MenaQ7: Menaquinone vitamin K2 is a critical cofactor in mitochondrial function. Additionally, calcium buildup in the arteries of the brain and heart is associated with low intake of K2. 80% of the population is believed to be K2 deficient.

Quercetin: Quercetin is a natural polyphenol that has been shown to be another critical cofactor in mitochondrial biogenesis. Quercetin also enhances trans-resveratrol's absorption and bioavailability.

Trans-Resveratrol: Trans-resveratrol is a powerful inducer of mitochondrial energy production. Researchers are finding it to be useful in addressing and improving brain function and brain aging.
