

# 100 YDS MOA TARGET

CUT OR TEAR ALONG DOTTED LINE AND KEEP AT BENCH FOR REFERENCE

This is a 100 yard MOA target designed for zeroing and tracking of your MOA optic. All target dimensions are in MOA, unfortunately printing of this target from a home printer will inevitably result in a slightly scaled down version of the target, fortunately the difference is insignificant and is of no concern.

Grid pattern in background = 1" squares.

4 corner boxes are 1 MOA x 1 MOA and are 6" on center, these can be used for tracking purposes.

The red ring is 1 MOA in diameter with a 1/2 MOA circle inside of it.

The congruent rings are 1/2 MOA apart at the thicker rings.

**.5 MOA = .525" @ 100 YDS**

**1 MOA = 1.05" @ 100 YDS**

**2 MOA = 2.10" @ 100 YDS**

**3 MOA = 3.15" @ 100 YDS**

**4 MOA = 4.2" @ 100 YDS**
