ATTACHMENT • SMOOTH CONTROLS • NITROGEN

PURGED • FULLY MULTI-COATED LENSES •

ADJUSTABLE EYECUPS & DIOPTER • FOG PROOF •

WATER PROOF • SHOCK PROOF

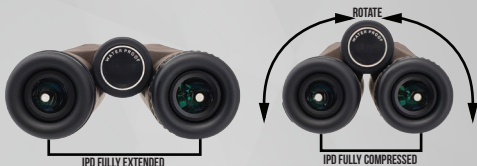

**DO NOT STARE
DIRECTLY
INTO THE SUN WITH
BINOCULARS**

BASIC OPERATIONS

Binoculars are relatively easy to use and are an essential tool for all sportsmen and outdoor enthusiasts.

INTERPUPILLARY DISTANCE (IPD):

Interpupillary Distance is the distance between the centers of your right and left pupils. Adjust the IPD of your binoculars to the interpupillary distance of the user's eyes so that you clearly see a single image that is free of shading

To adjust the IPD grasp both tubes of the binocular in your hands rotate the binocular tubes along the entrnal pivot point until the desired interpupillary distance is achieved.

EYECUPS

The adjustable eye cups rotate up and down for comfort and visibility. To adjust the eye cups simply rotate the eye cups up or down until you found your desired position.

PRO TIP: The eye cups can be used with or without eyeglasses. When eyeglasses or sunglasses are in use try turning the eye cups all the way down, conversely when not using any eyewear try extendin the eye cups.

FOCUSING THE BINOCULARS

Focusing the binocular is very simple. To adjust the focus you will want to cover the right eye by either closing your right eye or covering the objective lens with the included lens cover. With your right eye closed manipulate the center focus dial left or right until a clear picture is achieved. Once you have the center focus dialed in to your left eye switch eyes and close the left eye and open the right eye. With your left eye closed use the diopter adjustment to fine tune the focus of your right eye until you have a clear picture. Once you have achieved your preferred focus setting you should see the same clarity through both eyes. With the focus set you can now adjust the center focus dial and focus on objects at various distances to achieve maximum picture clarity.

WHAT IS INCLUDED IN THE BOX

Carrying Case • Adjustable Neck Strap • Owner's Manual • Lens Covers • Lens Cleaning Cloth

LENS CARE

PLEASE BE SURE TO EXERCISE THE UTMOST CARE WHEN MAINTAINING THE LENSES OF YOUR BINOCULARS.

Be sure to utilize the provided eyepiece and objective lens covers to protect the lenses when not in use. Store your APEX Binoculars in their carrying case when not in use.

KEEPING LENS CLEAN

Keep your binoculars in optimal working condition by taking the time to regularly clean the exterior lenses:

Be sure to remove any dust or grime from the lenses before wiping. Utilize the appropriate tools to clean your lenses, such as canned air 'keyboard duster': or specialty lens brushes and cloths.

Clean any smudges, fingerprints, or oils from the lenses. Blow on the lenses to fog the glass, then use a non-abrasive lens cleaning cloth to clean the lenses.

Use appropriate lens cleaning solutions, optical paper, cleaning brushes and/ or lens cloths to clean lenses.

USING MATERIALS NOT DESIGNED FOR LENS CLEANING CAN PERMANENTLY DAMAGE THE SURFACE OF A LENS AND POSSIBLY VOID YOUR WARRANTY.

No gimmicky names or slogans to make our Lifetime Warranty sound better than what it is. At Atibal we call our Lifetime Warranty a Lifetime Warranty. If you Atibal product becomes defective, broken, or is no longer working we will get it repaired or replaced. It's that simple.
